HARRISON A. KEITH,

HENRY McGRATH,

GEORGE W. MORTON,

DR. J. H. ASH.

INAUGURAL ADDRESS

1894.

Hon. WILLIAM A. HODGES, Mayor.

MAYOR'S ADDRESS, 1894.

GENTLEMEN OF THE CITY COUNCIL:

In accordance with an established custom and one which seems to me entirely proper, I desire to address you briefly on affairs that will be brought to our attention for our consideration during the ensuing year, and I intend to speak to you as one should to those who are associated together to transact any ordinary business. We have been selected by the inhabitants of the City of Quincy to have charge of their interests, just as any corporation selects its agents. It has been said that one of the strong points of our charter is that we can see where the responsibility lies, if the public business is not properly conducted, and that the executive and the legislative branches are entirely independent of each other. Whether experience will verify this theory remains to be determined and I will not discuss it at this time. But it seems to me that in order to arrive at the best results for those who employ us, we should endeavor to have as much harmony as possible between the two branches of the government. The time we are here together will soon pass away, but the record of our work will remain to be scanned

and criticised by those who succeed us, and it behooves us to make a creditable and honorable record. It will be my endeavor to perform the duties which devolve upon the executive in such a manner as will warrant me the support of the legislative branch of this municipality.

FINANCIAL SITUATION.

The finances of the city demand our most earnest consideration. The true rule of economy is that we should spend only what we have. We cannot be niggardly; we must not be extravagant. The laws of the Commonwealth point out how we can raise money, and set the limit of our expenditures. A successful administration of the city government depends upon the careful adjustment of the spending of our income, so that no one need of the city shall be recognized and provided for without due regard for all other reasonable demands of our municipal life.

When Quincy became a city in 1889, it had, practically speaking, no debt. In five years the city's debt has been run up to within 12 per cent. of the total limit of indebtedness allowed by law. It is scarcely profitable for me to discuss here either the causes that led to the acquiring of such a debt, or the reasons or explanations then or now advanced in favor of such a course. The fact remains that we have nearly exhausted our borrowing capacity. Hence our mode of municipal living for many years to come is as clear as sunlight: first, we must provide for our necessities; second, we should get all the comforts that we can afford; third, we must banish utterly from all consideration anything that remotely approaches to a luxury.

CITY DEBT, JAN. 1, 1894.

	Totals.	Falling due this year.
Willard School special,	\$1,000	\$1,000 Jan. 1
Washington Street,	8,000	2,000 Jan. 1
Hancock street,	28,000	4,000 May 1
Street crossings,	2,000	2,000 May 1
Burial places,	2,000	2,000 May 1
Common street,	8,400	1,200 June 1
Hancock street, 2d loan. . . .	10,000	1,000 June 1
Neponset bridge,	12,000	2,000 July 1
Wollaston school,	6,000	1,000 July 1
Willard school,	4,000	2,000 Aug. 1
Land, Willard school,	6,000	1,000 Sept. 1
Land, Willard school,	3,480	580 Sept. 1
Willard school,	42,000	7,000 Nov. 1
Willard school,	4,200	700 Nov. 1
Water street loan,	25,000	
Lincoln school,	25,000	5,000 Dec. 1
Central Fire station land,	7,000	2,000 Dec. 1
Central Fire station building,	20,000	2,000 Aug. 1
Water street land damage,	6,000	3,000 Dec. 28
Hough's Neck fire alarm,	1,100	1,100 June 1
Stone crushing plant,	5,500	1,100 Feb. 15
Six circuit repeaters,	1,700	1,700 June 1
High school plans,	1,000	1,000 Dec. 1
Water carts and hydrants,	2,000	
High school lot,	15,000	
Rep. hose house Wards 5 and 6,	1,000	1,000 Aug. 1
Grade of Cross street,	500	500 Aug. 1
Curbing Wollaston and Willard sidewalks,	600	600 Aug. 1
<i>Carried forward,</i>	<u>\$248,480</u>	<u>\$46,480</u>

	Totals	Falling due this year.
<i>Brought forward,</i> . . .	\$248,480	\$46,480
Watering Beale, Brook and Willard streets,	1,000	1,000 Oct. 2
Land hose house, Ward 2, . . .	1,500	1,500 Oct. 2
Rep. Willard and Washington school houses,	1,500	1,500 Oct. 2
Centre street drain,	1,200	1,200 Oct. 2
Adams street,	7,000	1,000 Oct. 2
Grade Winthrop avenue, . . .	650	650 Oct. 2

High school house,	62,000	7,000 Dec. 1
Plans, hose house Ward 2, . . .	200	200 Dec. 15
Plans, hose house Ward 4, . . .	200	200 Dec. 15
Arnold and Newbury streets, . .	400	400 Dec. 15
Sidewalk, new road,	300	300 Dec. 15
Beale and other streets,	4,000	1,000 Dec. 15
Street widening,	10,000	2,000 Dec. 15
Playgrounds,	50,000	1,000 Oct. 1
	<hr/> \$389,730	<hr/> \$66,730

WATER LOANS.

Extension of mains, note, . . .	\$24,000	\$1,000 Dec. 1
Extension of mains, note, . . .	30,000	1,000 Sept. 1
Purchase bonds,	600,000	20,000 Aug. 1
	<hr/> \$654,000	<hr/> \$22,000

The city's valuation in the past three years is as follows:

	Total valuation.	Abatements.	Net valuation.
1891	\$14,427,030	\$173,215	\$14,253,815
1892	15,566,920	146,688	15,420,232
1893	16,638,070	158,575	\$16,479,495
			<hr/> \$46,153,542
Average valuation for three years,			\$15,384,514

Under recent legislation we have the right to raise money in one of two ways. First, we may assess not exceeding \$12 per \$1,000 of the assessors' valuation for the preceding year less all abatements; thus, we may raise this year a tax amounting to \$197,753.94. Second, we may assess on the average of the assessors' valuation for the preceding three years; this would give us \$184,614.17.

Our limit of indebtedness is 2 1-2 per cent. on \$15,384,514, viz. \$384,612.85. From the above table of city debt it appears that we have now an indebtedness of \$389,730. In addition to this, we have assumed on account of the water supply of the city \$54,000 for the extension of water mains, and \$600,000 for the purchase of the water plant late of the Quincy Water Company. The city's debt, therefore, is almost one million dollars, of which the sum of \$88,730 falls due this year.

Both in the raising and the spending of the city's money we must bear in mind that the sole desire of our citizens is that they shall have a municipal government so honestly, impartially and economically administering their affairs that there will result the greatest good for the greatest number at the least expense.

CITY CHARTER.

It is well known to all that some objections to our City Charter have been raised. The chief one is that the election of a councilman-at-large means only the election of one more councilman from the ward in which he lives. Even if this view has no support in the facts, there can be no denying that it exists in the minds of many of our citizens, whose good faith cannot be questioned. This state of opinion should not be ignored, and it seems as if this, the sixth City Council, could silence these objections by making a record for economical

administration. Although, for convenience, nominations are made by political parties, every one of you, like myself, received votes from both parties, and we ought for that, if for no other consideration, to put the welfare of the city before that of any ward or any party. Let the test of any measure be "Will the benefit to the whole city warrant the proposed action?"

I am of the opinion that the department of public works would be better managed by three commissioners, to be appointed by the mayor, than by one, as at present. Such a board could take all the care and responsibility, which is sometimes too much for one man, could decide upon measures and could appoint a superintendent who would carry out their plans and attend to details. They could be selected from a class of our citizens who cannot give all their time to public service, but who would be willing to serve at a nominal or moderate salary.

I recommend that steps be taken to have our charter so changed that more councilmen shall be elected at large, and that three commissioners of public works be appointed by the mayor.

ASSESSMENT OF TAXES.

One of the most important as well as one of the most difficult branches of the public service is to adjust and fix proper valuations on all property, both real and personal. Each should be placed upon a substantial basis. This basis for valuation of property for taxable purposes is the fair market value of the property at the time the assessment is made. A system of making strained or fictitious valuations is wrong and pernicious and will prove a great injury to any city or town in which it is adopted. Great care should be taken to equalize values and to see that justice is done to all. Excessive valuation is apt to lead to uncalled-for extravagance and should never be permitted.

FIRE DEPARTMENT.

The principal part of our fire apparatus has been moved during the year into the new central fire station on Quincy avenue. The building on School street, formerly used by the department is now unoccupied and should be either utilized or sold.

WATER DEPARTMENT.

The purchase of the water works of the Quincy Water Company has been consummated and the city is now the sole owner. At the last election the special act of the Legislature in relation to our public water supply, was accepted, and it now rests with the city government to take the necessary steps in furtherance of the decision of the citizens.

SEWERAGE.

The question of sewerage will without doubt have to be considered before long. But however desirable a system of sewerage may be, the financial situation of the city is such that we should not be justified in deciding the subject this year.

SUPPORT OF THE POOR.

The support of our poor is a matter which should receive our careful attention. It may be said that too much charity breeds pauperism. To some extent that may be true, but it depends entirely upon how charity is bestowed. While most cases of destitution are the result of some one's bad conduct, the suffering usually falls on those who are innocent, and they should be dealt with kindly.

POLICE DEPARTMENT.

The city government having organized a police force, care should be taken that it should be composed of men who are well qualified in this line of duty. Their time should be wholly occupied in enforcing the laws and not be used for political purposes by any party. All laws should be energetically and impartially enforced. The voters having again pronounced against legalizing the sale of intoxicating liquors, care should be taken to see that it is not sold illegally either in some obscure kitchen or in a gilded drug store. All officers should be instructed to see this law enforced, as well as the laws to prevent any felony or misdemeanor. When officers are found incompetent they should be discharged and others put in their places.

. WORK FOR THE UNEMPLOYED.

The problem which is exercising all our cities at the present time is that of providing work for those who are in a condition of enforced idleness. The last Council appropriated sums for the extension of water mains and for the widening of streets. I shall endeavor to see that the work is carried forward as rapidly as the weather will permit and in such a way that those for whom the appropriation was intended shall receive the benefit.

NEW INDUSTRIES.

Our city is unfortunate in the fact that it depends almost wholly upon one industry. The granite business is our main stay, and whatever affects that, affects all our interests. Owing to the troubles of 1892 and the depression of 1893, very little work is being done and the consequence is that all our tradesmen feel the effects. It is of the utmost importance that we

should secure other industries. This subject has previously been brought before the Council, but I am not aware that any result was accomplished. If an energetic committee should be appointed, to offer inducements to manufacturers and others, and in various ways to perform the duties which in some cities are the province of the board of trade, it would be one of the most important committees of the Council, and if properly constituted, might exert very great influence for the prosperity of our city. Serious consideration might be given to the question whether the city could not, either independently or in connection with the Granite Manufacturers' Association, take measures to promote, financially or otherwise, the granite industry. I recommend the appointment of such a committee.

PUBLIC WORKS UNDER CONTRACT.

I am of the opinion that this city should, except in rare cases, avoid having its work done under contract. The following reasons bring me to this view. It has been the experience of many cities that work done under contract is apt to lead to abuses and corruption, and not to come up to the required standard. So well is the latter fact appreciated that it is the almost universal custom to have an inspector to watch the contractor. If the Commissioner of Public Works has the capacity to make a contract, and has the courage and honesty to force a contractor to keep up to his specifications, he is then competent to be the contractor himself; that is, he is the proper person to perform the work and may dispense altogether with the services of the contractor. If I wish to build a house I think it wiser to employ a man to purchase material, procure workmen and oversee the work, than to let the job out. It is easier to look after my foreman than after a contractor. Furthermore, no man takes a contract unless he expects a profit. It is evident either

that the city will pay more than the cost of the work or that the contractor intends to get the advantage in the material or workmanship. Again, in many cases a contractor lives in another place, brings with him his plant and often his men, and the money paid him leaves the city. If the Commissioner of Public Works has charge of the labor, and our own citizens have the preference, a great part of the cost remains in Quincy and the money circulates among our tradesmen. For these reasons I think that the business interests of our city would be served by having all our public works carried on, whenever practicable, wholly by our own officials.

HOUGH'S NECK.

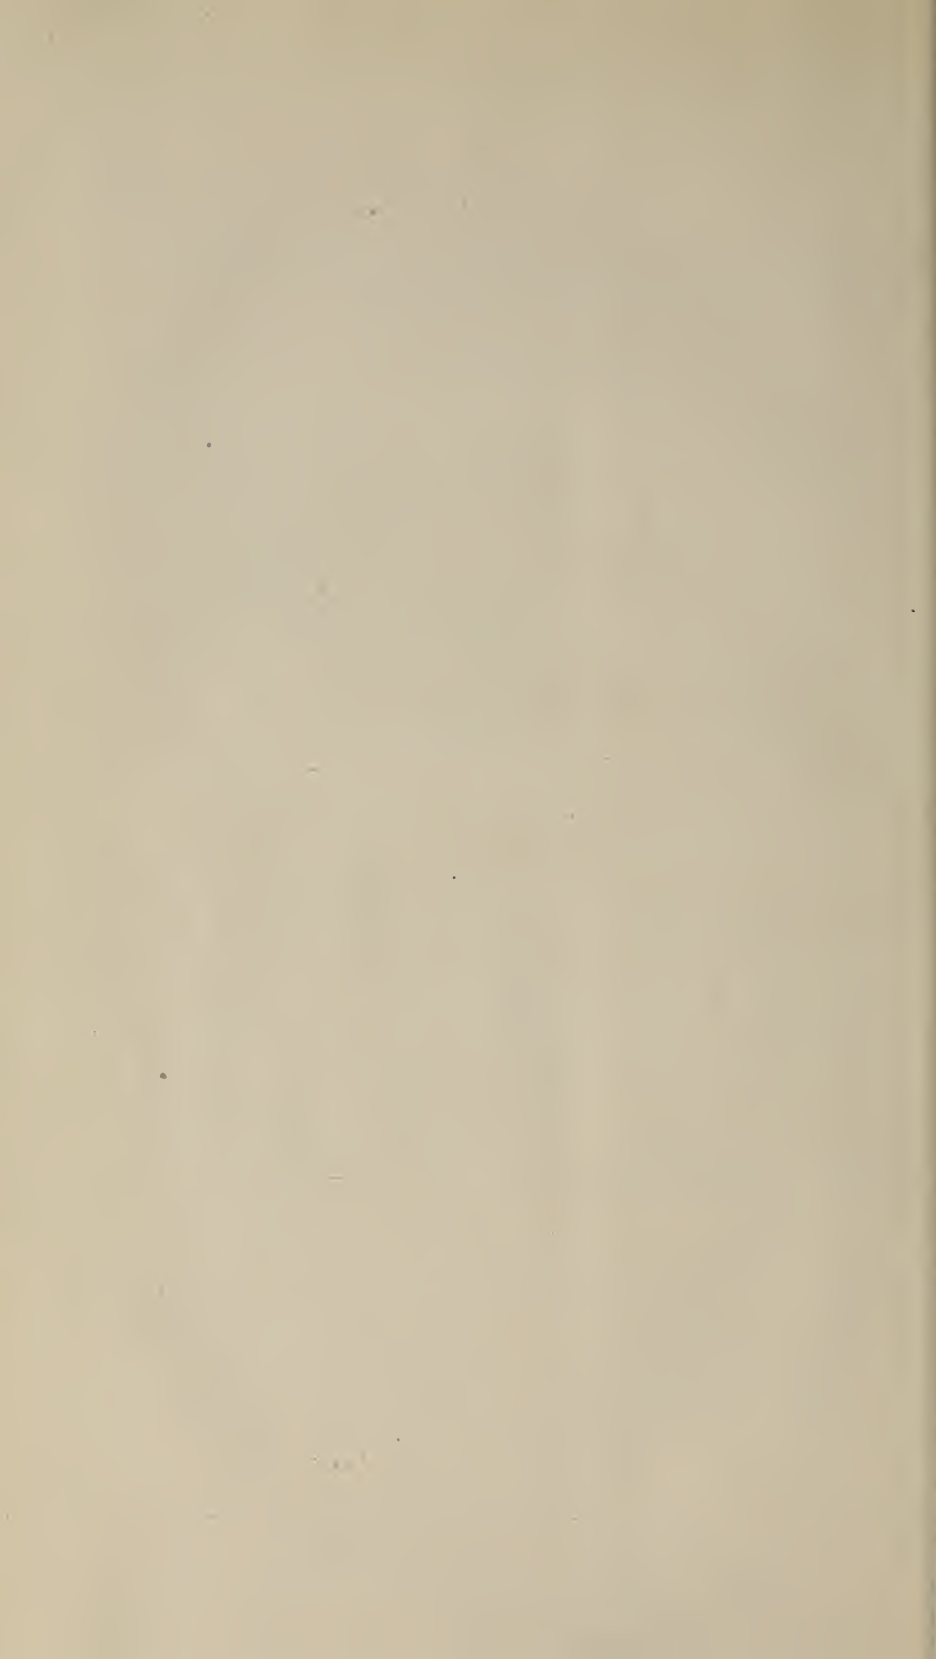

Quincy is fortunate in its situation on the border of the sea. Hough's Neck is one of our most beautiful and enjoyable possessions. For a long time known only to a few of our citizens, it has of late been visited by throngs of people, old and young, and is now the part of the city most sought after in hot weather.

The old road, as originally laid out, was very narrow, but for years answered well enough the uses for which it was required. Now, however, from one-fourth to one-third of its width is occupied by the tracks of the Manet Street Railway and is rendered practically useless for driving purposes. If this road could be widened and so built that carriages could go east on one side of the track and return on the other side, many of the annoyances which now attend the trip would be obviated. This widening can be done now at a reasonable cost before the adjoining land is built upon, and the city would then have a boulevard which could not be surpassed south of Boston, and one of which it might well be proud. In view of the strong public demand for

this improvement, I recommend that the Council take steps to ascertain the probable expense of such widening.

PUBLIC SCHOOLS.

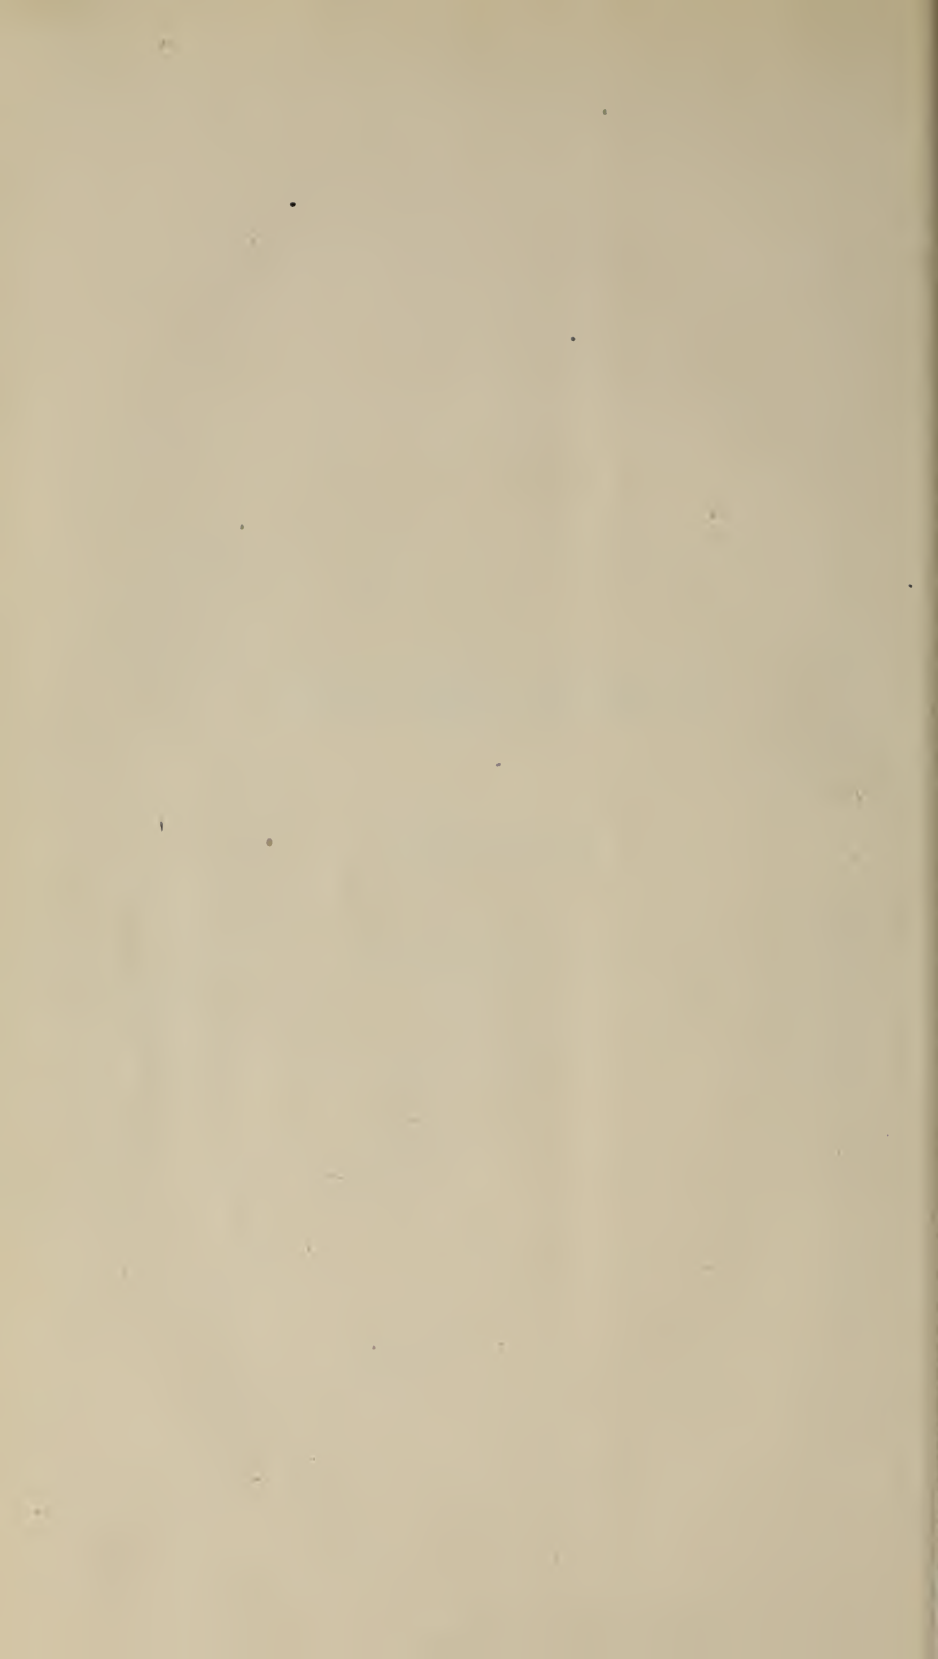

All will agree that the children in our schools should be properly educated and that the public school system is one of the greatest safeguards of our free institutions. Quincy has never been backward in furnishing the money necessary for the support of schools, and I think that the interest taken in them by our citizens cannot be surpassed in any place in the Commonwealth. That very interest and the watchfulness consequent upon it, have prompted a fuller investigation of the methods and management than has prevailed in other communities, and the parents of the pupils follow with constant care the progress and defects of this department of our municipal affairs. It is beyond dispute that for some years past many of our intelligent citizens, fully competent to judge, have thought that the results obtained did not justify the large expenditures. While I yield to no one in believing in the necessity of keeping the schools up to the highest possible educational standard, and in acknowledging the conscientious efforts of our school authorities, I deem it my duty to call the attention of the Council to this feeling of dissatisfaction, which is more prevalent than is generally supposed, and I think that the appropriations for school purposes should be carefully scrutinized.

DEPARTMENT OF PUBLIC WORKS.

To His Honor, Henry O. Fairbanks, Mayor of the City of Quincy.

SIR:—I have the honor to submit my third and the fifth annual report of the Department of Public Works, embracing the care of streets and ways, construction and repair of public buildings, care of street lights, collection of garbage, bridges, culverts, drains, and advertising, printing, stationery, etc.

HIGHWAY DEPARTMENT.

The care of our streets requires the larger part of my time and the same problems arise each year as to what methods are to be pursued, and what streets are to be put in repair. I have as in the past acted as superintendent, employing a foreman at a nominal price to oversee the work and only by the most rigid economy been enabled to accomplish the amount of repairs that have been done. It must be evident to all, that with the small appropriation of \$15,000 for Miscellaneous Highways, and the very severe wear that our streets are subjected to by our heavily loaded teams, that all our streets cannot be maintained in first class condition. I have for the past three years selected such streets as in my judgment required repairs the most, paying but little attention to ward lines although each ward and section of our city has received very nearly an equal amount of money and repairs. Some sections require more permanent work than others and consequently more expensive.

It can readily be seen that work cannot be done as thorough as one would like, or as I believe should be, as the calls for repairs are so loud and the pressure so great in all sections, that much work is done that is not permanent.

Taken as a whole, I believe that our streets show improvement each year, and in a few years more will compare favorably with cities of the same size near Boston, notwithstanding the severe wear they receive by our stone teams. This city should annually pave some portion of its streets, selecting those most needed, and adding to them, year by year, until all streets much used by stone teams are paved.

Some special appropriations were made for streets during the past year and I will briefly refer to them. The Auditor's statement will show to whom all moneys were paid.

I feel that I must say a few words as to the way the water mains have been laid in some sections of this city the past year. The work was done by John Cashman, by contract. Considerable blasting was required to be done in places. After laying the pipes the trenches were filled promiscuously with rock and loose earth, no effort being made to return the better material of the surface of the road or properly tamp the trenches. This is not as it should be, as the injury to the streets are very considerable, and could nearly or quite all be avoided if work was properly done. I entered my protest to the proper authorities, but with little effect.

FAXON PARK STREET.

An appropriation of \$500 was made in December of last year for this street. The street leads from Franklin street to the park owned by the city. The street was partially built by the town but never completed. It has been graded and graveled its entire length and is now in very good condition, although but little used. Owing to the grade (which is quite steep) it will be liable to wash somewhat after heavy rains.

WINTHROP AVENUE.

An appropriation of \$650 was made for changing the grade of Winthrop avenue in Wollaston. This has been done by cutting down a hill some three feet and filling up a hollow, and thereby improving the grade of the street and also the property in that section.

WATER STREET.

The work of grading, paving and widening this street was completed early in the spring; making one of the finest streets in our city and the only street paved its entire width. This street is much used by stone teams, and while a large amount of money was expended by the city for land damages and for rebuilding, it will be found to be economical in the end, as but little money will be required to keep the street in repair.

SOUTH STREET LEDGE.

The sum of \$450 was appropriated in December of last year for removing ledge alongside of the road on South street. This work was done during the winter months and gave employment to a number of men. It greatly improved the street and also removed a dangerous obstruction to travel.

CROSS STREET.

An appropriation of \$1,000 was made for the regrading of this street, but as some of the abutters refused to release claims for damages, no work was done upon it.

CENTER STREET DRAIN.

An appropriation of \$1,200 was made for constructing a stone drain from Granite street to the brook on Brook avenue, a distance of about 1,100 feet. The drain was built and three catch basins constructed to take the surface water from the street. Sidewalks were also constructed upon both sides of the street, and the street very much improved generally.

ARNOLD STREET.

The sum of \$200 was appropriated to raise the grade of this street. The street is about 450 feet in length running from Washington street to a private way. The grade has been very materially changed as it required nearly eighteen inches of

filling to bring the street to a proper grade. As the work was done in December of this year with snow and ice upon the ground, it will need some attention in the early spring.

NEWBURY STREET.

This is a short street near the Neponset bridge, running from Hancock street southerly. A fence was built along the side of the low land and a general improvement made of the street.

ROBERTSON STREET SIDEWALK.

A gravel sidewalk has been constructed on the northerly side of this street, a fence built alongside of the brook and low lands, and the street widened thereby.

ADAMS STREET.

An appropriation of \$7,000 was made late this fall to widen and regrade Adams street from Goffe street to Whitwell street. The work was not quite completed owing to the freezing of the ground and snow storms early in December. The work was quite expensive as the grade of the street was changed considerable in some places, requiring the cutting down of the surface in places while in others deep filling. A large amount of crushed stone was used and a solid substantial road was made. About 1100 feet of stone wall removed and re-laid, sidewalks constructed, gutters paved, and a portion of the hill under-drained. Some 600 feet of drain pipes was laid and four catch basins built. This was necessary to do away with the water which has always been troublesome in this section, both summer and winter — an under ground spring being the cause. I believe that the drain referred to above will do away with the water in this locality at all times.

I had intended to construct a catch basin at the corner of Whitwell street and lay a drain to the brook, so as to do away with the water at this point also. There is a balance of the appropriation remaining in the treasury sufficient to complete the work as contemplated and also grade the street. The improvement of the street should be continued to Furnace brook, and when complete will be one of the best streets in our city.

STREET WIDENING.

At a meeting of the Council early in December, the Mayor recommended an appropriation of \$10,000 for widening South, Centre, Willard, Squantum streets and Central avenue, for the purpose of giving employment to those who were out of work and at the same time improve these streets by removing in places, banks of earth, rocks, brush, etc., and filling the low places along side of the road. The Council at a subsequent meeting passed the order and work soon commenced. A gang of men was put at work upon each street so as to give employment to as many men as possible in each section of the City. Many more applications were received in South and West Quincy than could be put at work at one time, and in order that all might receive work, each gang was employed three days per week. The weather was quite favorable and quite an amount of work was done. Many of these men had been out of work for some time and as the outlook for the stone business during this winter is poor, this work will be of great assistance to many worthy families. The problem of providing work for the unemployed has always been a difficult one, this year more so than usual, owing to business depression throughout the country generally.

STREET WATERING AND PURCHASE OF WATER
CARTS.

The City Council this year appropriated the money for the purchase of four Water Carts, and after investigating the different styles in the market, four of the Studebaker wagons were purchased as being the best for general use. After one season's work, I believe no mistake was made as they have given the best of service where used, and I believe the public will bear me out in this statement. Nearly ten miles of streets were ordered watered, and in order to do all the watering which was called for in the several orders, other carts were required and a contract was made with Mr. Wilson Tisdale to furnish carts and do such other watering as was not covered by my teams. The carts used by him were of the old style and the service was not as good,

nor could it be expected to be, as with the more modern carts used by the City but on the whole fairly satisfactory. One half of the cost was ordered to be assessed upon abutting estates.

EDGESTONES AND SETTING.

The appropriation made for edgestones and setting where the abutters pay one half the cost, has been but partially used, as not as many applications were received as in former years, and all who applied for and agreed to pay one-half the cost were attended to.

EDGESTONES AT WILLARD AND WOLLASTON SCHOOLS.

Six hundred dollars were appropriated for edgestones and sidewalks at the Willard and Wollaston school buildings. The order has been executed and good gravel sidewalks constructed.

STONE CRUSHING PLANT.

This plant is located at Keenan's quarry on South street, the land being leased of Mr. Terrence Keenan for ten years. The plant is entirely new, consisting of one No. 3 Gate's crusher, 30-horse power engine, 35-horse power boiler, a building with storage bins of 300 tons capacity and with blacksmith shop connected. A track with three branches runs from the quarry to the breaker. Cars are loaded with stone in the quarry connected with engine by wire pulley, and carried direct to the breaker. After being crushed are conveyed to the storage bins by elevator where they pass through a revolving screen and are separated in three different sizes. The bins are fitted with shutes, controlled by a lever, so that a cart can be loaded in one minute's time. The plant is a good one and is being copied by other cities and towns. The need of this labor-saving plant was advocated by me strongly the first year of my administration and again during my second year. The good work which it does, and the saving of labor to the city, fully bears

out the stand which I took for such a plant as we now have. The annual saving to the city over the old method will soon pay its entire cost. The plant is one of the best in New England.

BRIDGES, CULVERTS AND DRAINS.

The bridges have been looked after as in previous years. Neponset bridge has been repaired by new planks where needed, and the bridge at Quincy Point looked after by the Trustees of Quincy, Weymouth and Hingham, and they are in good serviceable condition. A number of culverts have been relaid and enlarged and are in better condition than when my last report was made.

STREET LIGHTS.

The streets of our city are lighted by gas, oil, arc and incandescent lights. In December the city ordered a number of new incandescent lights placed, and the order was immediately given to the Quincy Electric Light & Power Company, and they will soon be in operation. The amount now annually paid by the city for lighting our streets nearly equals the amount which is appropriated for the care and repair of our highways. The matter of street lighting is quite a serious one, as each year many petitions are presented for additional lights, and if all were granted a much larger sum would be annually expended.

GARBAGE.

The collection of garbage has been done as in previous years, with increasing calls for service, and also for the removal of ashes and rubbish. The collection of garbage has required the entire time of one team, which is all that has been at my service, and most of the time two men have been employed upon the work. Some sections of the city could not be covered by this team more than once a week, which is not often enough to collect garbage in the summer season. Another team should be employed in this work and also for the removing of ashes.

PUBLIC BUILDINGS.

The brick Central Fire Station which was in process of construction when I made my last report was completed early in the spring, and is a very commodious and substantial building, fully meeting the wants of the department in the central portion of the city. Additions have been made to the Wollaston and Atlantic hose houses for the accommodation of horses which are to be kept in the buildings. The usual minor repairs have been made to the school buildings and they are in fairly good condition. A fire escape has been added to the Almshouse as a safeguard to the inmates, in case of fire. Alterations should be made to City Hall for the better accommodation of the various officers. Plans were ordered by the Council of 1892 for the remodelling of the building but no appropriation was made for the work. The Water Department and also the School Committee hire rooms in other buildings and if the change as contemplated by the plans were made, both of these departments could be accommodated in the building and a large saving made in rent. The rooms in City Hall are poorly arranged, no one department being entirely separate, and at the same time there is a large amount of waste room which is not now available. More vault room is required by the City Clerk, Assessors and also the Treasurer, and this could be provided for by the contemplated change. The plans are on file and the matter should receive early attention.

The building on School street which was vacated by the fire department is used for the storage of water carts and the engine which was formerly used to run the old crusher.

HIGH SCHOOL BUILDING.

An appropriation of \$15,000 was made for the purchase of a lot of land corner Hancock street and Butler road, and \$62,000 for building a brick and stone High schoolhouse thereon. A contract for the building has been made with Henry Mellen & Son of Worcester, Mass., for \$45,323. The contract was let November 29th, and work soon commenced. The cellar is at this time

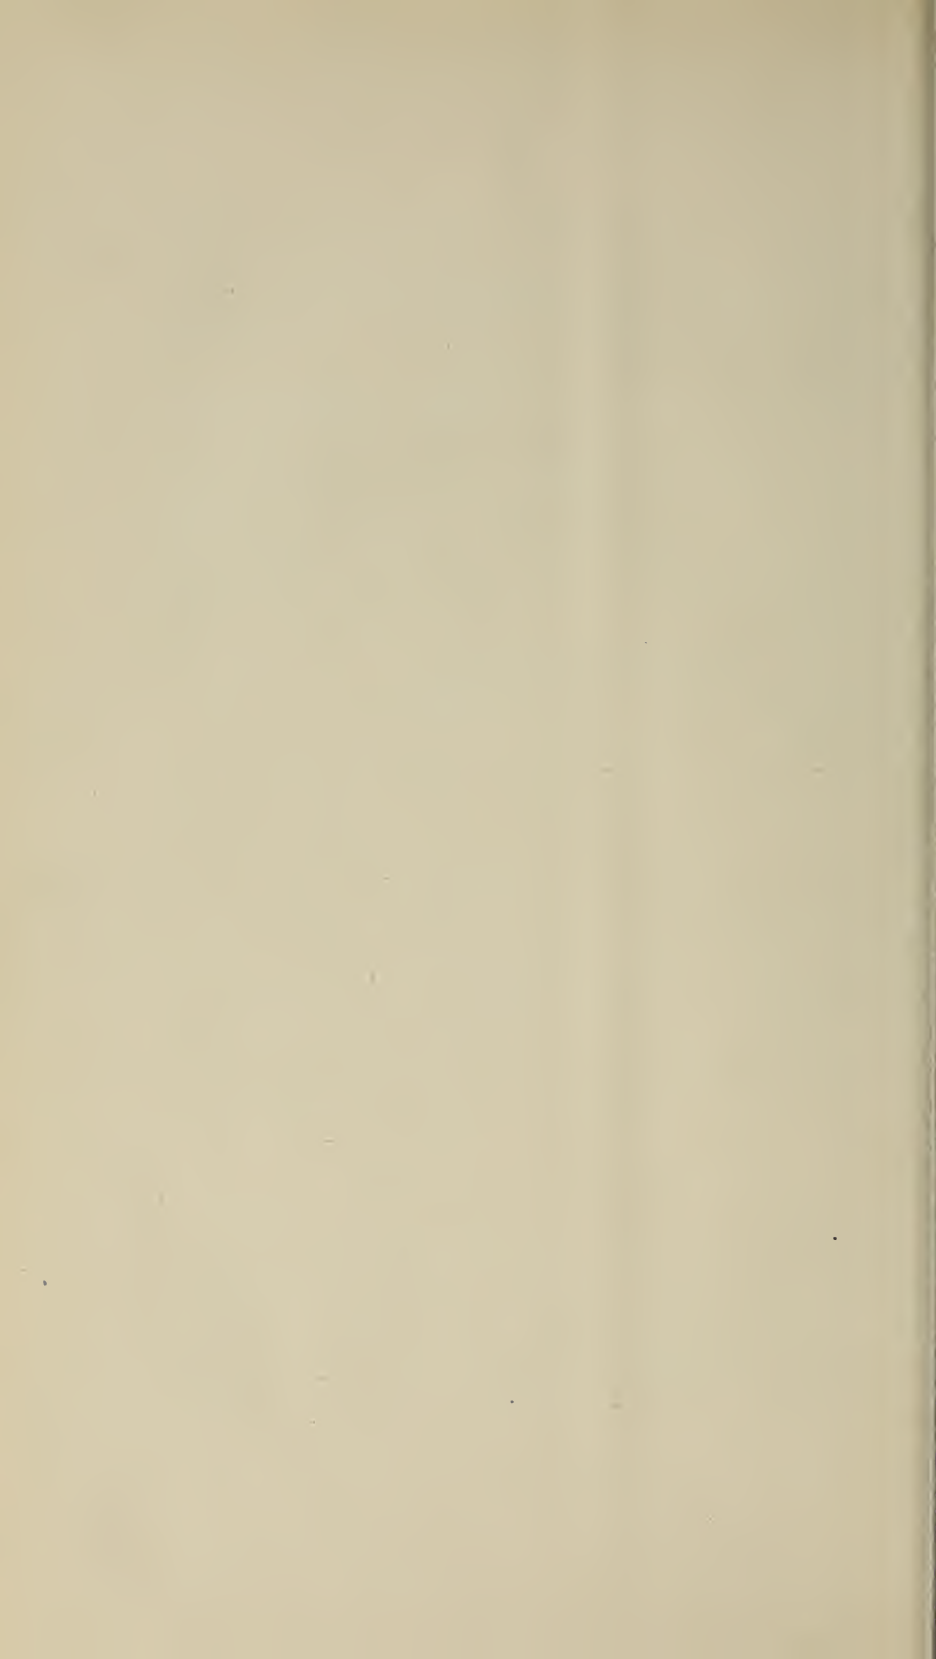

very nearly completed, and work will be pushed if the weather is favorable. The contractor agrees to finish the building complete, on or before August 1st, 1894, and the building can then be furnished and occupied by the school at the commencement of the fall term.

I again thank His Honor, Mayor Fairbanks, the various officers of the city government and the citizens generally for their support and encouragement during the past three years. I have carefully looked after the various departments under my charge, and endeavored to receive full value for all moneys expended, and I believe it will be conceded by all that many improvements have been made throughout our city in the last few years.

Respectfully submitted,

W. W. EWELL,

Commissioner of Public Works.

REPORT OF THE ASSESSORS.

To His Honor, the Mayor of Quincy:

The Board of Assessors submit herewith their annual report. We have assessed upon the polls and estates of the City of Quincy for the year 1893, the following sums:

City tax, (levy voted by the City Council)	\$160,000 00
City tax, (notes maturing during the year)	62,962 00
City tax, (interest to be paid during the year)	13,000 00
City tax, (extra levy for interest)	3,000 00
County tax (less polls)	7,795 24
State tax, (less polls)	10,042 00
Polls	11,066 00
Overlayings	6,082 26 $\frac{1}{10}$
Total	<u>\$273,947 50$\frac{1}{10}$</u>
Number of polls	5,533
Gain	182

Omitted and re-assessed taxes as follows:

On property	\$535 22 $\frac{1}{2}$
On polls, (304)	608 00
	<u>\$1,143 22$\frac{1}{2}$</u>
Tax rate, 1893	\$15.80 per \$1,000

TABLE OF AGGREGATES.

BRYANT N. ADAMS, Collector.

POOR DEPARTMENT.

Hon. William A. Hodges, Mayor City of Quincy :

SIR: — I herewith submit my annual report as Overseer of Poor of the City of Quincy, year ending December 31, 1893.

My report shows the appropriation as overrun \$35.02 but with less than \$100 due from the city and a credit to offset in bills mailed Jan. 1, I was able to keep within the appropriation.

The council reduced the appropriation in 1893 to \$6,500, and of that amount \$2,900 was expended in the different hospitals of which I have practically no control, thus leaving \$3,600 for the outside poor and Almshouse, which speaks volumes for the frugality and industry of our citizens. Our city is feeling the depression in business and I would ask for an appropriation of \$7,000 and income, as the Overseer of the Poor wishes to keep within the appropriation and certainly could not use more than was necessary. Our Almshouse is under the care of Mr. and Mrs. Franklin Jacobs who have had charge for the past six years.

The number of inmates on January 1, were 9; admitted during the year, 23; 2 have died; 15 discharged and 14 now remains.

Respectfully submitted,

GEORGE H. FIELD,

Overseer of the Poor.

Quincy, January 1, 1894.

REPORT OF PARK COMMISSIONERS.

To His Honor, the Mayor of the City of Quincy :

The Board of Park Commissioners respectfully submit the following report :

The sum of \$1,000 was appropriated at the beginning of the year for the support of the Parks of Quincy. There was also received from various sources the sum of \$125.50, making the total sum at the disposal of the Commissioners \$1,125.50. Of this sum there has been expended \$625.63, leaving an unexpended balance of \$499.87. The largest part of the amount expended was used at Faxon Park in cutting out trees and removing the underbrush and marking the exact boundaries. A small amount of work yet remains to be done at this park, which when completed, your board feel confident, will show the natural beauties of it, and make it a delightful breathing spot for the city. We are to be congratulated in having two such beautiful natural parks as are Merrymount and Faxon. It is to be hoped that there will never be undertaken by any of the future boards of Park Commissioners any effort to destroy by artificial improvements, the natural beauties of these two resorts.

In the report of the Park Commissioners of last year, attention was called to the report of Mr. Eliot, which contained a scheme looking to the laying out of a boulevard or shore drive along the shore front of our city and the widening of Sea street.

Your Commissioners emphasize the recommendations of last year and hope that some steps may be at once taken to carry out the scheme proposed. No expenditure of money is required, unless it is wise to widen Sea street immediately. The improvement of Furnace brook was clearly outlined in Mr. Eliot's report.

For many reasons it is wise to act upon this scheme. Furnace brook is the natural line for the Trunk sewer from Ward 4 which will have to be built in the near future, and any work which improves this brook aids in the still greater scheme of sewerage, which problem is one year nearer in its needs.

The Board of Metropolitan Park Commissioners have taken a large tract of land on our westerly boundary. The Park Commissioners have given their consent to such takings.

We are unable to file with this report a plan of the takings. As soon however as a copy can be procured, it will be filed with the City Clerk.

PLAY GROUNDS.

In accordance with the recommendation contained in the report of last year's Board of Park Commissioners, and after a hearing before the City Council, the Council passed an order which was approved July 26, 1893, authorizing a loan for play ground purposes to the amount of \$50,000. In accordance with that vote your Commissioners located play grounds in Wards 2, 3, 4, 5 and 6, and of the sum ordered by the Council have used or will use when the deeds are passed, about \$43,000.

The land taken for the play ground in Ward 2, is located near Point Holes, and was formerly owned by Mrs. Waterhouse, Mrs. Tobey and Mrs. Hayward. Being unable to agree upon a price, and believing that the assessed valuation was ample for the same, your Commissioners have taken the land by the process of eminent domain, and have awarded as the price for the same, the sum at which it is valued by the Board of Assessors of the city for the year 1893. A portion of this land reaches the water and there are about eight acres in the taking.

Ward 3.—Your Commissioners have purchased as the play ground in this ward land lying south of Water street and east of Granite street about five acres in all. The deeds have been made out and titles examined, and paid for and therefore is in our control. There are two approaches to this land, one from Water street on the north 60 feet in width and one from the south 30 feet in width.

Ward 4.—Your Commissioners have purchased land for the play ground in this ward lying northerly of the old base ball grounds off Hall place and in addition, John Quincy Adams, Esq., has given a tract of land lying on both sides of Furnace Brook and adjoining this land. The gift, together with the purchases, makes rather more than 20 acres.

The Commissioners have thus secured a part of Furnace brook which they can improve, and wise action in securing that part between this point and that part in control of the Commissioners at Merrymount Park, will carry out the suggestions made earlier in this report.

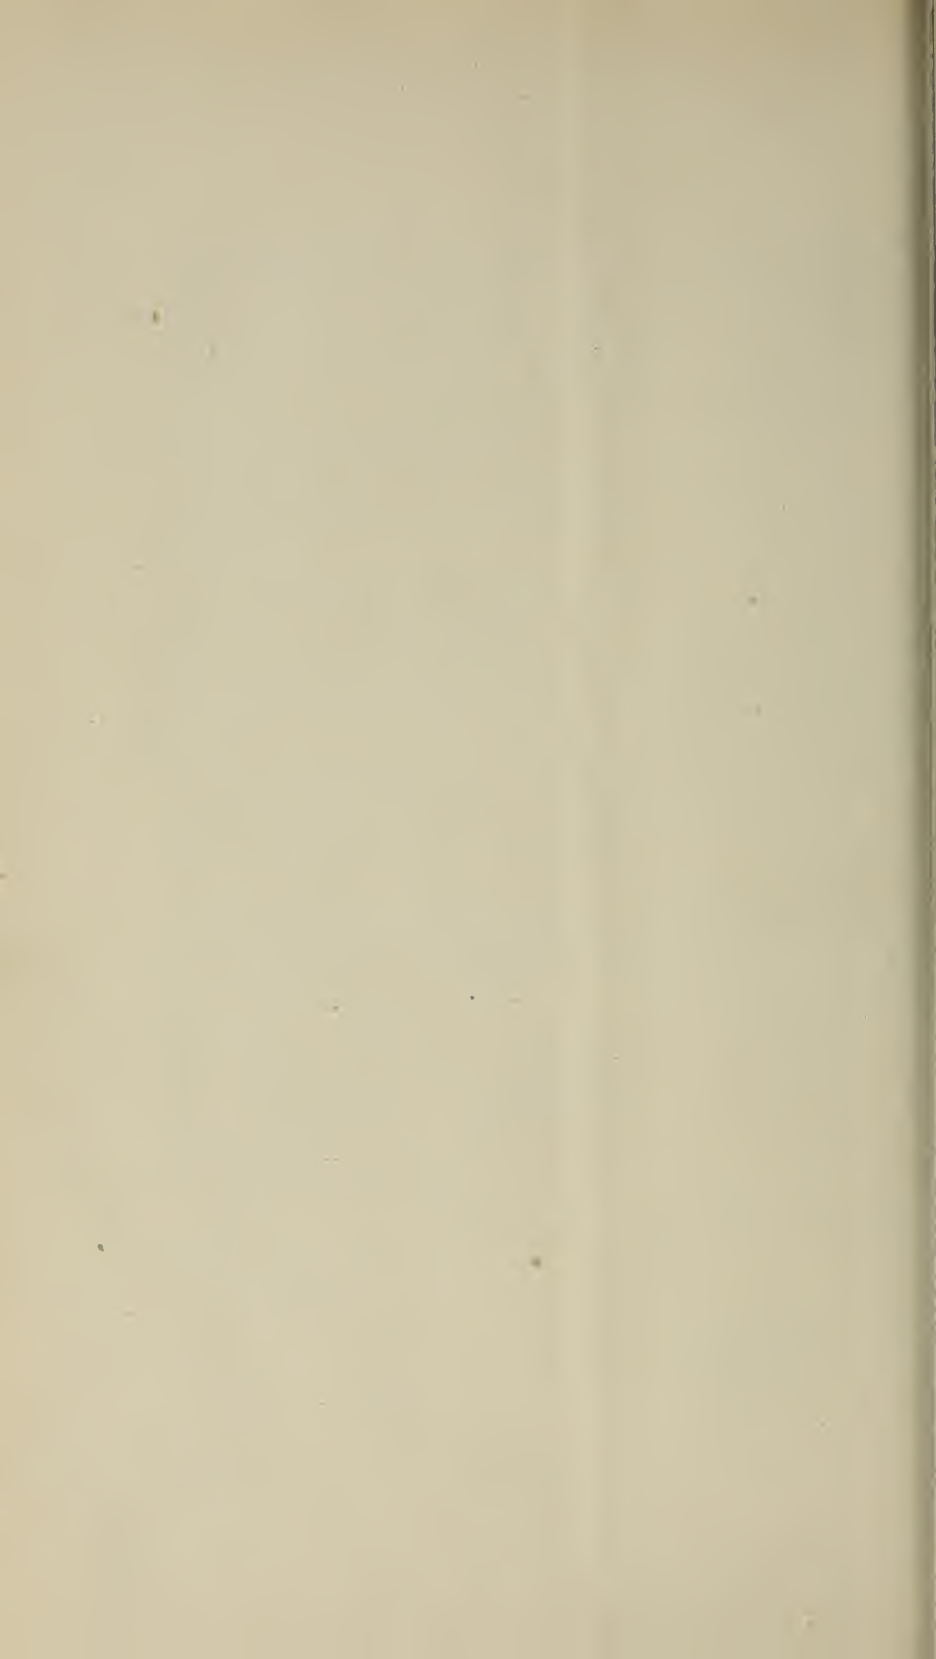

The location of play grounds in Wards 5 and 6 has been delayed by reasons entirely beyond the control of your Commissioners. They are in hopes, however, that in a very few days all matters in relation to the same will have been arranged, the grounds located and deeds made, and full control of the lots selected, vested in the city.

Plans showing the takings and purchases when all details are completed will be made and a copy of them will be filed in the office of the City Clerk and also in the office of the Park Commission.

Your Commissioners request that the sum of \$1,000, together with all income be placed at their disposal to be expended by them in maintaining the parks and play grounds for the year ensuing.

CHARLES FRANCIS ADAMS,
CHARLES H. PORTER,
WILLIAM B. RICE,

Park Commissioners.

PUBLIC BURIAL PLACES.

To His Honor, the Mayor of the City of Quincy:

The Managers of Public Burial Places respectfully submit their fifth annual report.

HANCOCK STREET CEMETERY.

This cemetery has received the usual care, the amount expended thereon being one hundred dollars. But few burials have been made here, and as far as possible it has been the aim to discontinue its use.

MOUNT WOLLASTON CEMETERY.

The sum of \$1,375 has been received from sale of lots.

The amount collected for labor on lots is \$1,268.

The "repair fund" for "perpetual care" of lots designated, has been increased by \$1,050, and now amounts to \$7,375.

Good progress has been made on the "Greenleaf Extension" by grading and suitable connection with the original cemetery, and lots will be laid out and numbered according to the plan, and ready for sale the coming season.

The Council appropriated the sum of \$1,100, and to this added estimated income of \$3,300, a total of \$4,400. The income actually received and paid to the City Treasurer is as follows:

Collected for unpaid bills for labor on	
lots in 1892	\$412 00
For labor on lots in 1893	1,268 00
For lots sold in 1893	1,375 00
For single graves sold in 1893 . .	20 00
For hay sold in 1893	43 92
For non-resident assessments 1893	38 00
For income of Repair Fund 1893	253 00
For income of Repair Fund	
special deposit, 1893	30 94
	<hr/>
	\$3,440 86
Appropriation by Council	1,100 00
	<hr/>
	\$4,540 86
Amount received in excess of appro-	
priation	140 86
Amount in excess of expenditures,	
\$4,266.91, as appears by the	
Auditor's report	\$273 95

If there are any unpaid bills against this account it is due wholly to the neglect of parties to present the same, but the amount must be very small.

Repectfully submitted,

JOHN HALL, Chairman.

GEORGE L. GILL, Secretary.

HEALTH DEPARTMENT.

To the Hon. William A. Hodges, Mayor of Quincy:

The Board of Health begs leave to submit the following report for the year 1893.

The board was organized February 11, 1893, by the choice of John H. Dinegan as chairman and Benjamin F. Thomas as secretary. Mr. James H. Cunningham was appointed Inspector. This was a necessary move as your board was informed by the Civil Service Commission that the incumbent was approved of by them at the urgent request of the Board of Health and as a matter of necessity after a non-competitive examination in which the applicant received less than 66 per cent. In an advertised competitive examination of all applicants at which the then incumbent did not appear, Mr. Cunningham passed an examination with a result of $87\frac{83}{100}$ per cent. That it was a good choice the result of his work will show.

The number of meetings held during the year was nineteen.

Your board strongly recommends that plumbing regulations or ordinances be enacted by the Council as a matter of safety to the public health. The Inspector is powerless without them in many cases. The brooks have been thoroughly cleaned under the direction of the Inspector and the board has every reason to believe that the work has been economically, thoroughly and conscientiously done. The secretary furnishes the following group of statistics with the assurance to yourself and the citizens of Quincy that it is not a thorough statement. The physicians are negligent in their duty of reporting contagious diseases and until they are brought up to the law the same state of affairs

will exist. As an instance of the neglect of the physicians, the board cites the following case: "The board gave to Mr. Brown, the undertaker, a transportation certificate for a body to be carried to Canada; the second day after a postal reached the office notifying us that the person was affected with a contagious disease." There has been more cases reported in the DAILY LEDGER than to the Board of Health.

The table of nuisances discovered by the Inspector and the Board's action thereon will be found in the report of the Inspector to the Board.

Respectfully submitted,

JOHN H. DINEGAN,
B. F. THOMAS,
Dr. C. O. YOUNG,

Board of Health.

Quincy, Jan. 22, 1894.

REPORT OF INSPECTOR.

To the Board of Health of Quincy :

GENTLEMEN : — I beg leave to submit the following report. Number of nuisances discovered, 306; number abated 298, as follows :

Nuisances,	Discovered.	Abated.
Unclean privy vaults	80	80
Unclean cesspools	67	67
Bad surface drains	26	23
Broken and defective sink drains	21	21
Imperfect privy vaults	23	23
Sewage running into brook	19	15
Defective cesspools	12	12
Piggeries	10	10
Sink drains stopped up	9	9
Untrapped sinks	9	9
Filthy yards	7	7
Open cesspits	4	3
Filthy cellars	4	4
Sewage running into street	4	4
Sewage running under house	3	3
Unburied carcasses	2	2
Stagnant pools of water	2	2
Privy too near well	2	2
Obstructions in brook	2	2
	<hr/> 306	<hr/> 298

A difference will be noted between my report and the reports of previous years in the number of uncleaned privy vaults and cesspools a much larger number having been reported in former years. Your inspector has not included in his report a large number of cesspools that had not been cleaned during last spring as in his judgment they were not nuisances and were not likely too become such if left uncleaned for some time; only such as really were a menace to the public health have been reported as nuisances.

Under the head of bad surface drains, 26 are reported and this is only a small number of a very objectionable feature of our city. Some action should be taken by the board looking to having the custom of allowing the sewage to discharge on the surface of the ground discontinued. It is a very difficult matter to decide which are good and which are bad, if indeed any of the surface drains in this city are good. An ordinance or regulation that cesspools shall be provided for the reception and retention of sewage and affixing a penalty for failure to comply with same within reasonable time would undoubtedly reach this case and would cause all to be used alike.

The number of piggeries discovered was 10, all of which were abated on short notice. The city will be found to be remarkably free from nuisances caused by the keeping of pigs.

Another matter is the custom of house owners in draining their houses into the brooks. This is a bad and very dangerous practice as it really makes an open sewer of our brooks. Some discharge openly into the brooks and others through "blind drains." The first are easily detected and abated but the latter after being covered almost defy detection. The ordinance regarding cesspools would take care of this matter.

Another matter that I wish to call the attention of the board to is the poor plumbing done in our city. In the absence of any plumbing law or ordinance governing the plumbing, the work is done in the most slipshod manner, the cheapest and oldest obsolete materials and appliances are used. The traps are for the most part the **S** or siphon trap one-and-one-half inches in diameter, and in ten cases I found dwelling houses that had not even this trap. Few if any traps are vented and in only a few does the soil pipe run through the roof.

The brooks have been thoroughly cleaned under the direction of the Inspector this year. Furnace brook was thoroughly cleaned from above Cross street to Eaton's pond. The brook known as Phipps street brook has been deepened. Sachem brook in Wollaston was cleaned and deepened its entire length. The Copeland street brook or ditch was connected with Town brook by opening a ditch through land of W. Williams on Water street, thus abating what for years has been a nuisance danger-

ous to all in the vicinity known as Brewer's corner. Town brook has been cleaned from the Canal to Water street.

The land in rear of Drake's factory has been thoroughly drained by having the ditch opened and by the city constructing a deeper and larger culvert under Elm street.

Another nuisance of long standing that has been abated is the nuisance caused by T. A. Whicher & Co. discharging their exhaust into the street. The oil and waste water formed filthy pools on the street and vacant lot near factory and was the cause of sickness and many complaints. This nuisance was abated after many delays to the satisfaction of all concerned.

There still remains some obstruction in the brooks, one being a bridge on Miller street or avenue that is built on posts driven into the bed of the brook. These posts catch and hold all the rubbish that comes down the brook and at times almost chokes the brook. The posts should be removed and bridge raised as it is less than two feet above bed of brook.

At the corner of Canal and Washington streets the brook is covered by building supported by posts in the brook. The posts, as at Miller bridge, cause large deposits of rubbish to collect and it is very difficult to remove, as it has to be carried in small quantities some distance to get from under buildings.

The culvert under Furnace avenue needs to be enlarged as it is two feet narrower than the brook. To this small culvert can be attributed the overflows of past years.

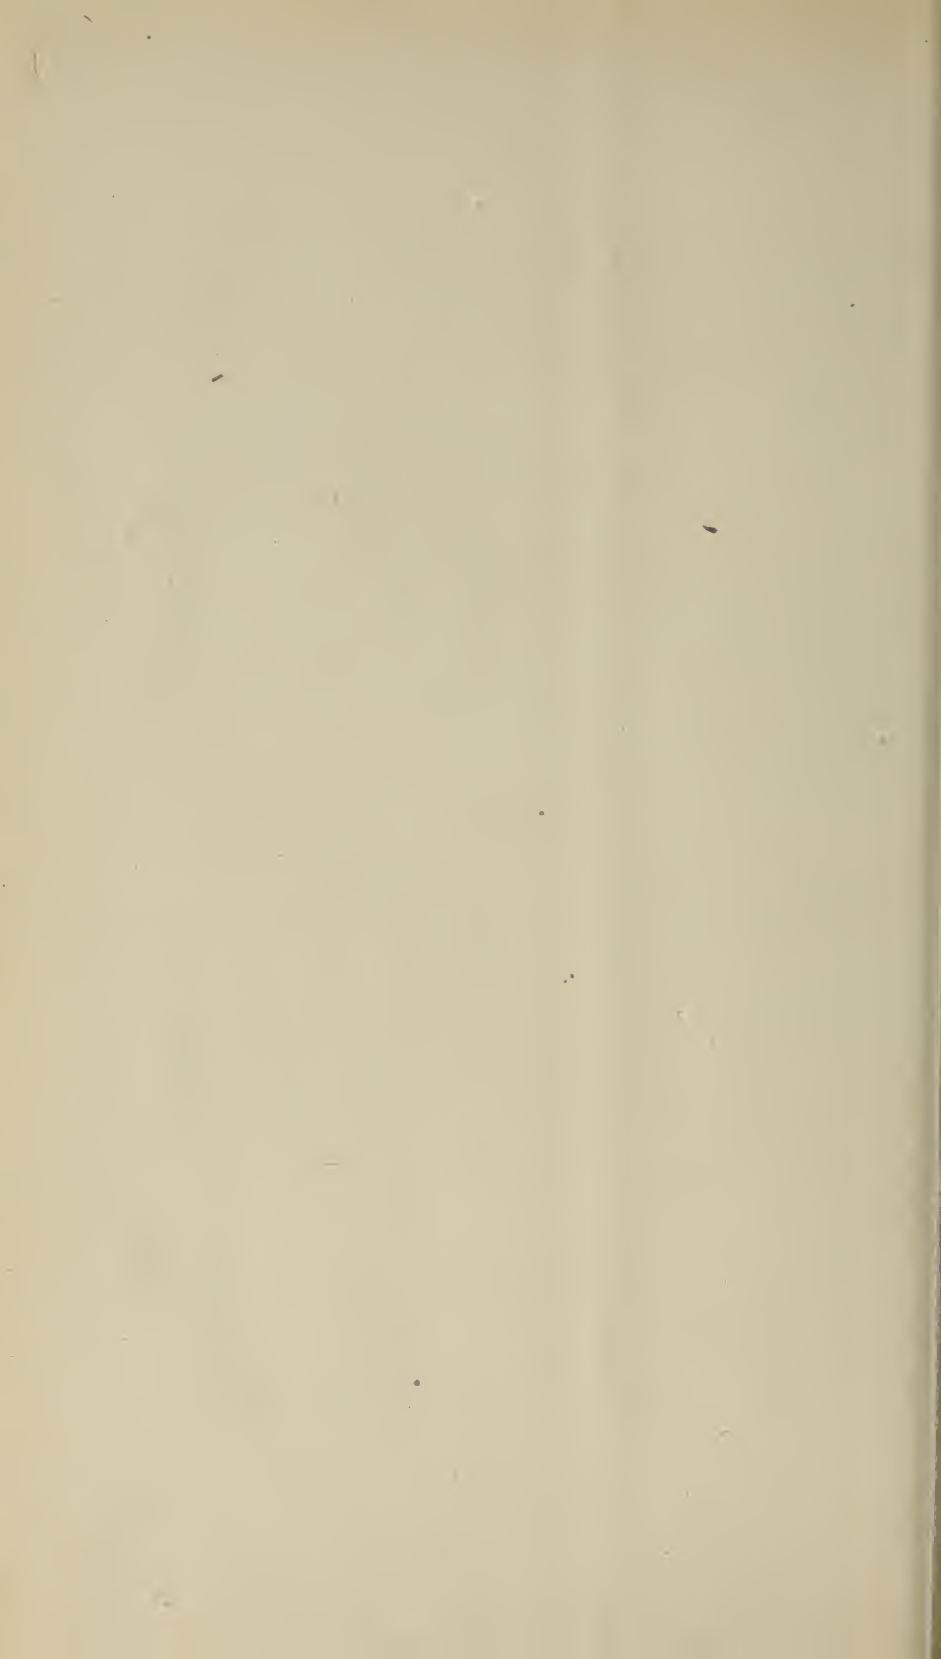

The culvert under Water street near Quincy avenue, is too small and is easily obstructed, and makes it impossible to properly drain the district drained by the Phipp street brook. This culvert is so small that in order to clear it of any obstruction the road-bed has to be dug up and the covering stone removed.

The retaining wall on Willard street has partly fallen into the brook and needs to be rebuilt.

Hoping that the suggestions contained in this report may be favorably received and thanking the Board for the kindness shown me during the past year.

I remain,

JAMES H. CUNNINGHAM, Inspector.

INSPECTION OF MILK.

To His Honor, the Mayor of the City of Quincy :

I have the honor to submit the following report of the Department of Inspection of Milk, for the year of 1893.

The principal duties of the Inspector, as defined by the statutes under which he acts, are the issuing of licenses, the registration of stores where milk is sold, collection and inspection of samples, and the enforcement of the laws in the courts.

LICENSES.

The statutes governing the sale of milk requires that every person who conveys, in carriage or otherwise, the same for the purpose of selling within the city limits, shall be licensed annually by the Inspector of Milk, and shall pay fifty cents to the use of the city. Every person before selling milk, or offering the same for sale in a store, booth, stand or market place, shall register in the books of the Inspector and shall pay fifty cents. Licenses are issued only in the names of the owners, and may not be sold, assigned or transferred. Each license records the name, residence, place of business, number of carriages or other vehicles used, the name and residence of every driver or other persons engaged in carrying or selling, and the number of the license.

The licensee is required to cause his name, the number of his license and his place of business, to be legibly placed on each outer side of all carriages or vehicles used by him in the sale or conveyance of milk, and to report to the Inspector any change of driver or other person employed. For failure to comply with

these requirements, or for selling or exposing for sale, from carriage or other vehicle, without first being licensed, a fine not less than thirty, nor more than one hundred dollars may be imposed. Repetition of the same offence calls for still higher penalties. Failure to register for the sale of milk from a store is punished by fine not exceeding twenty dollars.

INSPECTION.

The Inspector or his authorized collectors are empowered to enter all places where milk is stored or kept for sale, and all carriages used for the conveyance of milk, and may take samples of the same for analysis; and he shall cause the same so taken to be analyzed or otherwise satisfactory treated, the results of which examination shall be recorded and preserved as evidence. The owner or custodian has the right to demand and receive a sealed portion of the sample for his own use in case of complaint.

QUANTITY OF MILK SOLD.

The estimated number of quarts of milk for average daily consumption in the City of Quincy is six thousand (6,000), of which three thousand five hundred (3,500), are raised in Quincy.

Number of licenses issued to dealers conveying milk by carriage or otherwise, for pur- pose of sale : 	33
Number of registrations of storekeepers en- gaged in the sale of milk . . .	26
Number of all others 	11
<hr/>	
Total number of licenses and registrations .	70
Number of samples of milk and cream inspect- ed during the year 	331

There have been no complaints made during the year and no prosecutions.

Respectfully submitted,

CHARLES W. GAREY, M. D.,

Inspector of Milk.

INSPECTION OF ANIMALS AND PROVISIONS.

To His Honor, William A. Hodges, Mayor of Quincy :

Instruction to inspectors by the State Board of Commissioners :

TUBERCULOSIS.

1.—All herds within your district that are engaged in the production of milk that is to be marketed or sold, including milk or cream, sold to creameries, or in which there are animals that are being fattened for beef, shall be thoroughly examined by you as often as once in each three months.

2.—If they are found to be entirely free from disease, the same is to be certified by you upon a blank which will be furnished from this office, which blank shall be given to the owner of the herd, to be used by him for his own advantage. You will also send the required certificate to this office, and keep your own memorandum of the date and result of the inspection.

3.—If, on the contrary, tuberculosis is found to exist in the herd, each animal showing it shall be isolated on the farm, or in some other convenient place to be selected by you, and quarantined there, under the authority of the local Board of Health, who shall at once notify the Commissioners. The milk from such isolated animal shall not be sold, and in such instances the certificate of health shall not be given for the herd; or, if it has been previously given it shall be withdrawn.

4.—Quarantined animals must not be killed except by the permission of the Board of Health imposing such quarantine, and in your presence, as the inspector, or in the presence of an inspector appointed by them, who will at once certify the death to this office.

5.—Whenever you have reason to believe that new and uninspected animals have recently been introduced among a herd, or when from any reason, and any time, you have cause to suppose that disease exists in a heard, an inspection shall be made at once, and the directions already given shall be followed.

Inspectors are now required to inspect all animals no matter what they are kept for as often as once in three months.

INSPECTION OF MEAT.

1.—Report to the Commissioners the locations of all slaughter houses within your district give the name of the butcher, the class of animals killed, the days of slaughter and where the general market is sought.

2.—As to the periodical inspection of these slaughter houses, and the destruction of any meat that may be considered unfit for human consumption, direction and action is to be taken from your local Board of Health.

3.—When, however, tuberculosis is found to exist in a carcass, great endeavor is to be used to find the herd from whence the animal came, if the beef is of local production or otherwise, the town or State from whence it was procured, and a report as to the facts made to the Commission.

It is thought hogs have turberculosis and the inspectors have been instructed to inspect all carcasses of hogs in their district and as many others as they can and keep an account of the same.

GENERAL SUGGESTIONS.

1.—If for any reason you desire to know the name and the address of the inspector for any town within this Commonwealth from which animals may have been removed to your district you can obtain the same by reference to this office.

2.—If during any of your inspections you find any case of what is called variously, actimonymycasis, big jaw, wen, jaw ail, bone ail, or sitfast, in cattle, kindly report its location.

3.—Notify this Board of your action promptly.

4.—Notify this office of the number of blank certificates that you will possibly require.

PUBLIC STATUTES.

SECTION 1. The mayor and aldermen of cities and the selectmen of towns shall annually appoint one or more persons to be inspectors of provisions and of animals intended for slaughter, such inspectors shall be sworn faithfully to discharge the duties of the office, and shall receive such compensation as the city council or selectmen shall determine.

SEC. 2. Said inspector may inspect all animals intended for slaughter, and all meats, fish, vegetables, produce, fruits and provisions of all kinds, found in said cities and town, or exposed for sale or kept with intent to sell therein; and may for this purpose enter into all buildings or enclosures where said animals, meats, fish, vegetables, produce, fruits or provisions are kept, stored or exposed for slaughter or sale.

When such animals, meat, fish, vegetables, products, fruit or provisions are found on such inspections to be tainted, diseased, corrupted, decayed, or unwholesome from any cause, said inspector shall seize the same, and cause them or it to be destroyed or disposed of otherwise than for food; but if, at the time of the seizure, the owner of the property seized notifies in writing the inspector seizing the same of his desire to appeal to the Board of Health, said inspector shall cause said animals, meat, fish, vegetables, produce, fruit or provisions to be inspected by said Board of Health, or by a committee thereof, consisting of not less than two members; and if said board or committee find the same to be tainted, diseased, corrupted or unwholesome, they shall order the same to be destroyed or disposed of otherwise than for food, if said board or committee do not so find, they shall order said animals, meat, fish, vegetables, produce, fruit, or provisions to be forthwith returned to the owner thereof. All

monies received by said inspectors or Board of Health for property disposed of as aforesaid, shall after deducting all expenses incurred by reason of such seizure, to be paid to the owner of such property.

SEC. 3. Said inspectors may inspect all veal found in said cities or towns, or offered or exposed for sale, or kept with intent to sell therein, and if said veal is, in the judgment of the inspector, that of a calf killed under four weeks old, he shall seize the same and cause it to be destroyed or disposed of as provided in the preceding section, subject, however, to the provision therein contained concerning appellant the disposal of moneys.

I find in Quincy 683 cows, besides oxen, bulls and young cattle. I have found them with few exceptions, which were immediately taken care of, in a healthy condition, and think it safe to use the meat or milk from them; but almost every week animals come to this city from other places and are liable to bring disease I would advise buyers to purchase only healthy animals and be especially careful about cattle with a cough for such animals may have tuberculosis.

Meats and Provisions.—I find the provision stores with few exceptions well kept, but there are meat and fish carts that may have a good load one week and a bad one the next, I have been obliged to seize and destroy, and thus far there has been no appeal from my decision.

Respectfully submitted,

JAMES M. CUTTING,

Inspector of Animals and Provisions.

POLICE DEPARTMENT.

To His Honor, the Mayor of the City of Quincy:

SIR:—I have the honor to respectfully submit the following report of the Police Department for the year ending December 31, 1893:

Total number arrests	420
Males	403
Females	17
Residents	304
Non-Residents	116

Pocketbooks found and returned to owners	3
Book of railroad tickets found and returned to owner	1
Gold watch found and returned to owner	1
Disturbances suppressed	6
Lost children returned to parents	3

The City Treasurer has received in fees and fines \$1,129.77.

In submitting my annual report, I desire to thank all of those that have taken an interest in the department, and especially all the members of the department, for the promptness with which they have discharged their duties.

Respectfully submitted,

GEORGE O. LANGLEY,
Chief of Police.

LAW DEPARTMENT.

Hon. W. A. Hodges, Mayor:

SIR:— All of the actions against the City mentioned in my report of last year as pending in the Superior Court have been settled during the past year.

The cases of Charles E. Stratton vs. City of Quincy and Charles Loring Adams vs. same were settled without trial by agreement between the parties to said actions.

The case of Thomas D. Pierce vs. City of Quincy was tried at the last February sitting of said Court and a verdict was rendered in favor of the city.

In *re*-Charles E. Stratton et al. vs. Board of Health, the Superior Judicial Court (in Equity) after a hearing ordered a writ of certiorari to issue and later a compromise was effected and the action settled without a trial on the question of damages.

The following actions were commenced and entered in the Superior Court for Norfolk County against the City during the past year, viz:

Thomas McLaughlin vs. City of Quincy.

Addie J. Jackman vs. City of Quincy.

Sarah Kincaide vs. City of Quincy.

John A. McDonnell vs. City of Quincy.

Thomas Smith vs. City of Quincy.

William S. Williams vs. City of Quincy.

The first two of said cases were actions of tort for personal injuries received by said plaintiffs and after investigation and

before the trial it appearing, that the City would be held liable for the injuries received by the plaintiffs, on account of the defective condition of the streets complained of by the plaintiffs, both cases were amicably settled.

The last four cases are proceedings brought to recover damages for the land taken from the different petitioners by the City to widen Water street in 1892.

The Kincaide case was referred to Gordon McKenzie, John H. Dinegan and William A. Hodges as referees to determine the damages sustained by the petitioner. The referees after hearing all parties and viewing the premises awarded her the sum of \$1150 and interest and said award being satisfactory to all concerned was paid by the City. The three remaining cases are still pending in said Court.

The Commissioners appointed by the Supreme Judicial Court to determine the amount of money the City should pay to the Quincy Water Company for its property, rights and franchise on 26th of July, 1893, awarded the Company the sum of \$515,640.07.

Since January 1, 1893, a number of claims against the City for damages, on account of injuries received on highways within the City, after investigation, have been settled without suits being brought thereon.

I have written opinions on all questions and matters submitted in writing to me by the City Council, the committees thereof and the heads of the different departments of the City Government and have orally advised and otherwise assisted said officials in relation to such other matters connected with their departments as they desired.

JOHN W McANARNEY,

City Solicitor.

Quincy, January 1, 1894.

THOMAS CRANE PUBLIC LIBRARY.

The Trustees of the Thomas Crane Public Library submit herewith their annual report, being the 23rd of the whole series since the Library was opened.

The division of reading matter in the books borrowed during the year 1893 has not varied in any essential respect from the division in years immediately preceding, and is set forth in the following table:

	PUBLIC.	SCHOOLS.	TOTAL.	PER CENT.
Fiction . . .	24,138	195	24,333	32.9
Periodicals . .	19,126	417	19,543	26.4
Juvenile Fiction	14,193	1,319	15,512	21.0
History . . .	2,913	880	3,793	5.2
General Literature	2,438	88	2,526	3.4
Arts and Sciences	2,148	211	2,359	3.1
Travels . . .	1,811	458	2,269	3.0
Biography . . .	1,561	257	1,818	2.4
Poetry . . .	1,245	116	1,361	1.8
Religion . . .	371		371	.4
Educational . .	322		322	.4
	<hr/> 70,266	<hr/> 3,941	<hr/> 74,207	<hr/>

The number of books purchased during the past year was 290, of which 279 were credited to the foundation fund, or city appropriation, and 11 to the income from the Cotton Center Johnson fund. There have been 600 volumes rebound, and 265 volumes worn out in use have been replaced by new copies of the same books. There have been 159 pamphlets added to those al-

ready in the possession of the Library. The number of names on the Library register is 11,653, and of this number 649 were added during the year. The Library was opened to the public 304 days. On the 11th of March, 685 volumes were issued being the greatest number in any one day since the Library was opened.

Under ordinary circumstances, there would be no occasion for any special report from the Trustees at this time. The Library has gone on during the past year under the same faithful and competent officials, doing its work much as heretofore, and the Trustees have no matters of policy to which they now desire to call attention, nor any changes to suggest.

It so happens, however, that, with the close of the present year, for the first time in the history of the institution, a majority of the Trustees will be changed, only two of the present board continuing in the next. Among those whose term of service thus comes to a close is the present chairman, who has likewise been chairman of the board through a consecutive period of twenty years, and one other member, Mr. Claflin, who more recently has, as treasurer, been in exclusive charge of the funds of the Library, and also mainly entrusted with the purchase of books for it. Under these circumstances, and with a view to having a definite record of the policy which has been pursued of late, in the management of the Library's affairs, it seems proper for the board to make a somewhat detailed statement for future information.

The history of the Library from its commencement to the close of the year 1888, when the provisions of the city charter superseded in several important respects those of the original act of incorporation, was set forth in the eighteenth report of the Trustees (1889). The names of the Trustees up to that time, as also those of the Librarians, and their dates of service, were given, and a record of the various locations and removals of the Library.

In their twentieth report (1891) the Trustees set forth some facts and statistics of interest relating to the growth in the circulation of books during the first twenty years of the Library's existence, and the changes which were to be observed in the division of reading matter.

There are three distinct funds now connected with the Library, either the principal or the income of each of which is appropriated and should be applied to specific purposes.

These funds are (1) The Cotton Center Johnson fund of \$2000, the income of which is to be applied under the terms of the bequest to the purchase of books. These books are kept distinct from the body of the Library by means of a book-plate indicating the source from which they were derived. The recent policy of the Trustees has been to apply the income from this fund in common with the amount appropriated by the city for the purchase of books indiscriminately towards acquisitions. It has not at present been deemed desirable to apply the income of this fund to any special purpose or particular branch of literature. It might, perhaps, at some future time be used to advantage as a fund set aside for the purchase of works of reference.

(2.) The Crane fund represents an amount given by the Crane family for specific purposes. The family have also from time to time indicated their intention of further contributing to this fund, and it has been thus far set aside and allowed to increase with a view of ultimately using it for the ornamentation or repair of the Memorial Hall or its approaches. What is now most needed is a pavement from the street to the building of a permanent and better character than that in use since the Memorial Hall was erected. The Trustees have intended, as soon as the means at their disposal would permit, to lay these approaches with block payments of the description in use on Boston common, between Park square and Park street Church. The cost of this improvement would be larger than the fund would now justify. Nevertheless, it is much needed.

(3.) The Catalogue fund is an accumulation from book fines and other miscellaneous sources, which the Trustees have set aside to use for printing a new catalogue when the time for so doing shall arrive. The present printed catalogue has now been in use nearly eighteen years, and is out of date. The course intended to be pursued in this important particular was set forth by the Trustees at length in their report of a year ago, (1892), being the twenty-second in the whole series. The cost of printing a proper catalogue for the present collection of books, would

not be far from \$2,500. The police of the Trustees has been to accumulate a fund for this purpose by appropriating to it annually one-half of the dog-tax. It has been assumed that, by pursuing this course, the fund would accumulate sufficiently to permit the Trustees to enter upon the work of printing the catalogue in the beginning of the year 1895, or one year hence. The existing catalogue will then be so much out of date as to be no longer really available for library purposes.

The policy in all other respects which the Trustees have pursued in respect to the management and use of the Library is fully set forth in the series of their annual reports. It has been their purpose to make the collection, in so far as possible, not a Library for reference, or one adapted to the needs of general scholars or special investigators. Their purpose has been to make it a thoroughly useful People's Library, what might perhaps best be described as a University Annex to the Common School System. To this end they have labored to keep it well supplied with a good collection of standard English works of every description, with a large selection of the best periodical literature, and with the most comprehensive, useful and latest books of reference. They have never considered it advisable to go to any large extent into specialties, professional literature, or rare and costly publications.

With this policy in mind, the Trustees a year ago set forth in their report (1892) with great detail and as matter of record, the limits within which they thought it desirable the Library should be confined. It was not deemed desirable that any attempt should be made to render it comprehensive through a vast accumulation of miscellaneous and incongruous literature. On the contrary, as the cost of a volume is on an average one dollar, and that of cataloguing it as nearly as may be, 25 cents, it becomes obvious that after a Library exceeds 10,000 volumes the expense of keeping it well catalogued, and only through being catalogued can it be made generally accessible, becomes so great that it is practically out of the question. A library of 40,000 volumes, for instance, by no means now a large library or one of even usual size, would cost in cataloguing not less than \$10,000. Three-fourths of this sum in such a case as that of Quincy, it has al-

ways seemed to the Trustees, could much more advantageously be applied to the purchase of 7500 new books, after culling all superfluous material out of the collection and cataloguing the remainder.

The policy of the Trustees has further been to improve and increase the collection, so far as it could judiciously be done, through gifts from private sources. They welcomed the Cotton Center Johnson bequest as the first step in a direction which they hoped others interested in the library would hereafter not be slow to follow. Could bequests or gifts of money be made to the Thomas Crane Public Library, from which the Trustees would have a book fund of \$1,000 per annum, that sum would be ample in the opinion of the Board to provide for all necessary book purchases, relieving the city of that burden. So far as running expenses are concerned, including salaries, ordinary care of grounds, heating, lighting, etc., it has seemed to the Trustees proper, as matter of policy, that these should be met by a city appropriation.

The repair, maintenance and ever increased beautifying of the building is another matter. As its name indicates, the Hall was erected by the widow and children of him whose name it bears as a lasting memorial of the sterling and lovable qualities of a husband and father, and of his attachment to his native place. Designed by the first architect of his day, it has ever excited the admiration of those qualified to judge of such matters, and has been in itself a liberal education to the inhabitants of Quincy. There is nothing of its kind in the Commonwealth finer or better. Remembering, therefore, the knowledge, good taste, affection and generosity which originally led to the gift, the Trustees have believed that provision would ultimately be made for the repair and preservation of the building and grounds, and their gradual improvement, through the further liberality of the family of Mr. Crane. They have, indeed, from time to time received intimations that such was the intention of Mrs. Crane and Mr. Albert Crane. Should that course be pursued, the building and grounds will remain, as they should remain, a lasting reminder to all future generations not only of an individual, but of that private munificence which has already

done so much for Quincy and which, in the future, is destined to do so much more.

ADAMS ACADEMY.

To His Honor, the Mayor of the City:

The Managers beg leave to present the following report:

As is generally known the election of Dr. William Everett to the Congress of the United States necessitated the choice of another principal of the school.

Dr. Everett resigned the charge of the school August 1, 1893, and after conferring with the supervisors of the Adams Temple and School Fund a choice was made of Mr. Wm. R. Tyler to succeed Dr. Everett as principal, his salary to be \$2,500 per annum. Mr. Tyler retains the former assistants, Mr. John O. Hall, Jr., and Mr. William S. Burrage and the school is now being conducted by three instructors in place of four as formerly.

Only one pupil attends the school from a distance, requiring that he should board in the town. He is provided for at the house owned and maintained by Dr. Everett and situated on Elm street.

When it was known that Dr. Everett would resign the charge of the school, the question of providing for non-resident pupils was a serious one for all interested in the Academy to consider. This difficulty was happily provided for by Dr. Everett offering to keep the house open for at least one year, to receive any who might desire to avail themselves of its privileges, one teacher of the school to board at the house free of charge.

At the present time there are 6 non-resident day pupils in the school and 42 resident pupils. Total of 48.

The Managers feel called upon to ask as many pupils as possible to contribute to the fund of the school by the payment

of the usual sum for their tuition as the funds of the school are still meagre and it would seem that seventy-five dollars from any who are able to pay is a small sum to require for the advantages which the school affords.

There were 38 pupils in the school at the close of the school in June, 1893. Of these 8 were in the graduating class.

Of this number 3 entered Harvard, 1 entered Williams and 2 entered the Law School of the Boston University. Two non-resident pupils returned to their homes. Of the remaining 30, 27 returned to the school in September, 1893.

EXPENDITURES.

REPORT OF LIQUOR OFFICER.

To His Honor, the Mayor of the City of Quincy :

I herewith submit my second annual report as Liquor Officer for the City of Quincy for the year ending December 31st, 1893.

During the past year I have used my best efforts to suppress the sale of intoxicating liquors in this city, and I believe that I can again safely say that there is less liquor sold here than in any other city or town of its size in this state. The trade is such that the common mode of treatment for other crimes is not applicable to this business. Hard work is necessary, and the suppression of the liquor traffic requires the ever watchful eye to keep it in subjection. As I remarked in my last report, I believe that a liberal expenditure of money in the future, to continue the fight, is better than allowing the traffic to branch out, when the expense will be four fold to again conquer it.

In closing, I heartily tender my thanks to the Mayor, the police offices and to each and all who have ever been ready and willing to assist me whenever and wherever needed. A detail report of the work of 1893 follows.

Respectfully,

DANIEL McGRATH,

Liquor Officer.

THE WORK IN DETAIL.

During the year ending December 31, 1893, I have by authority of the courts seized by warrants, liquors from eight

different parties, and in seven cases the liquor has been declared forfeited and delivered to the proper authorities and in one case ordered returned to the claimant. I have also made, or caused to be made, complaints for other violations of the liquor laws and warrants have been served in most cases with the following results:

Complaints made to search for liquor	8
Warrants issued to search for liquor	8
Search warrants used	8
Liquor found and seized	8
Cases returned to court for prosecution	8
Cases heard in court, seizures	8
Claimants appearing	2
Number claimants	6
Cases of liquor forfeited to Commonwealth . .	7
Cases of liquor returned to claimants	1
Number cases, liquor delivered to Commonwealth and vouchers taken	7
Complaints made for other violations of liquor laws	13
Warrants issued for other violations of liquor laws	13
Warrants served	11
Warrants not served	2
Number convictions under violations of liquor laws	11
Number paid fines	8
Number committed for non-payment of fines . .	2
Number appealed	1

The amount of fines paid into court for liquor violations is \$513, which after deducting the expenses has been turned over by the Clerk of the Courts to the City Treasurer. During the year I have also brought before the court other than liquor cases different parties the fines from them amounting to \$295, which after deducting the expenses has also been paid to the Treasurer of the city.

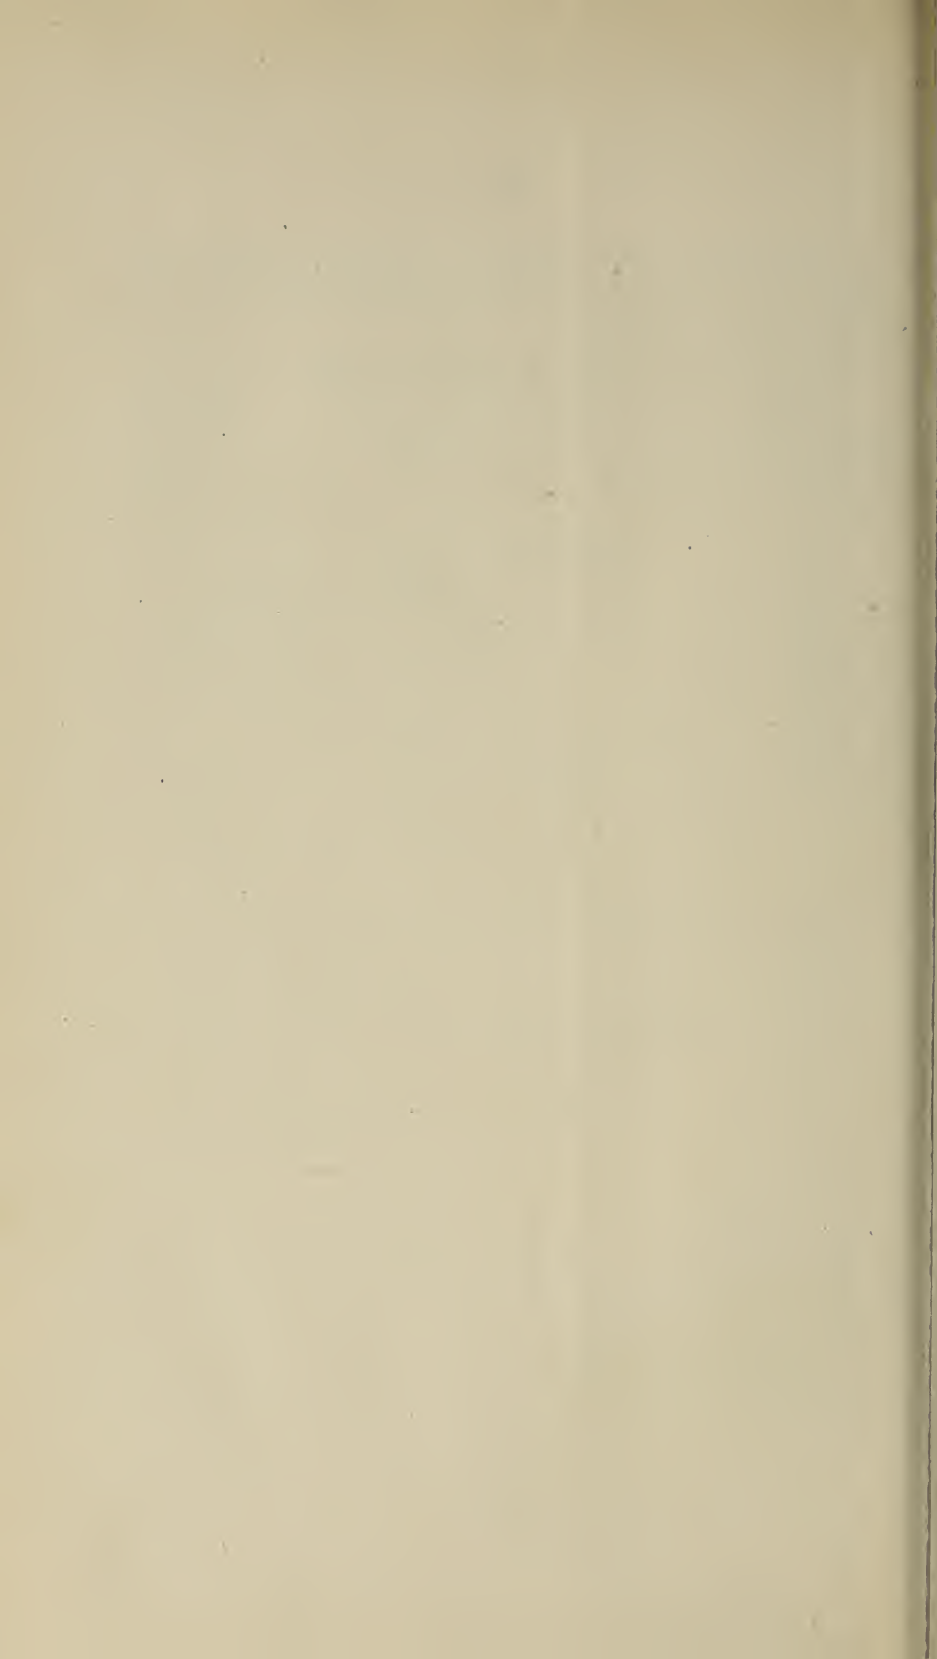

There has also been \$183 in fines imposed by the court where the defendants have been either committed for non-payment or have appealed.

The total amount of fines in all cases, both liquor	
and all other warrants served by me, is	. \$991 00
Total amount unpaid (appealed or committed)	. 183 00
Total expense in all cases 205 00
Leaving a net balance of 603 00

Respectfully submitted,

DANIEL McGRATH,

Liquor officer.

FIRE DEPARTMENT.

To His Honor, Henry O. Fairbanks, Mayor of the City of Quincy:

DEAR SIR:—In compliance with the requirements governing the Fire Department, I hereby present my fifth annual report, together with a list of the members of the department, their rank, age and occupation, location of fire alarm boxes, fires and alarms and inventory of the property belonging to, or in the possession of the department at this date. As I have stated in previous reports that it was the easiest part of a report to make suggestions in regards to wants and necessities to keep and maintain efficiency, I will improve the opportunity in so doing, hoping it will meet the approval of the incoming Mayor and City Council.

FORCE OF DEPARTMENT.

The force of the department remains the same, and is as follows: One Chief Engineer; six assistant engineers (as charter provides one from each ward), six permanent men and sixty-three call men, also one man who takes care of the chemical at Houghs Neck, making the entire paid force of the department seventy-seven men. In addition to this there was organized, or partly so, a volunteer company of ten men, summer residents of Houghs Neck, who after expressing their willingness to abide by rules and regulations governing the department were given keys to the engine house, also a copy of said rules and regulations. As this volunteer company can not be relied upon only during the summer months perhaps it should not be considered as a part of the force of the department, never-the-less they were willing to give me a lift and I will take this opportunity of thanking them.

APPARATUS.

The apparatus now consists of one (third class) Amoskeag steam fire engine, one combination chemical engine and hose wagon, with two ladders, (Halloway) one chemical engine, (Babcock) one ladder truck, one hose carriage three hose wagons, three hose jumpers, one light express wagon, used for fire alarm purposes and one supply wagon, also one hand engine (Granite) out of service and out of repair.

Extensive repairs have been made on the ladder truck this year of which I will speak later. Hose 3 wagon is sadly in need of paint also some other repairs but it is hardly worth while to do any painting as long as it remains in the present quarters as in my opinion it would be money thrown away.

As in my report of 1892, I have only to repeat the recommendation of having the hose carriage now located in Ward Two moved to the Central Fire Station and held in reserve, and a new hose wagon put in its place. This I believe would be a great advantage and would add to the efficiency of the department. My reason for this change I will give substantially as before. In case of a large conflagration this carriage could be got at so much quicker than to load hose from the tower, also on arriving at the place where the hose is wanted it could be put into service in much less time than it could possibly be from rolls which would come loaded in a hurry. The cost of a wagon to replace the carriage would be from \$300 to \$500 depending altogether on the finish. Hose 2 and 3 were originally built for \$300. Hose 2 has been remodelled and at the present time stands the city of Quincy about \$425. I will here recommend that Hose 3 be put in the same condition as Hose 2 as soon as there is a respectable place to house it. I am still of the opinion that a chemical engine located in the vicinity of City Hall would be of great service and as in my last two reports I would recommend the purchase of one. I will also recommend that a building be built in the rear of City Hall for the purpose of housing the same, also the purchase of a pair of horses and double harness and that three permanent and five call men be added to the force of the department for this piece of apparatus.

The need of enlarging the department will in my opinion be made apparent to all our citizens soon, more especially to those that are the largest owners of property. The large number of buildings now in process of construction and those to be erected will certainly demand protection. Some may think that I am too apprehensive, but I have seen the department put to a severe test during the past five years, when had another fire occurred at a critical moment the city would have been at the mercy of the flames. Another thing must be remembered and that is that the apparatus is substantially the same as it was in 1882, twelve years ago.

The fire risk is about double what it was then and I do not believe anybody thought that there was a surplus of apparatus at that time. With one steam fire engine, and that a third class, and twelve years old at that, it does not appear to your Chief Engineer that there is sufficient fire protection in the way of steam fire engines and I would recommend the purchase of two more and that they be located as follows: One at Wollaston near Norfolk Downs and one at West Quincy. In addition to the needs for fire apparatus, a new ladder truck would be of great service if located near Norfolk Downs and it is hoped by your Chief Engineer that the same will be purchased in the near future.

FIRE STATION.

In regard to the several fire stations, considerable has been done the past year. The new Central Fire Station on Quincy avenue has been completed and was occupied June 29. Hose 2 house in Ward Five, has been repaired and a piece built on so that now it will accommodate two horses. Chemical combination hose wagon No. 2 house in Ward Six, has also been repaired and a piece built on. This will also accommodate two horses and I will improve the opportunity in recommending that two horses be purchased for the purpose of hauling this piece of apparatus. It will also be necessary to make three of that company permanent, and I recommend the same be done. As there is to be a new hose house built in Ward Two, I recommend that as soon as the same is ready for occupancy that a permanent

horse (with swinging harness) and a permanent man to drive the same be added. As it is possible that Ward Four may get a new hose house, I will also recommend that a horse and driver for same be made permanent for that piece of apparatus. The engine house at Houghs Neck needs painting and the chimney needs repairing.

HOSE.

We have at this date 8,000 feet of hose in apparently good condition and about 400 feet that I would not consider reliable although it may do good service for some time. I would recommend the purchase of 1,000 feet which while making some addition will also replace some that will be condemned. The chemical hose is all good and will not need any new if no serious accident occurs.

WATER.

The water supply for fire service is good as far as it goes and has fulfilled the demands in every instance the past year, the average pressure being about 75 pounds. There are now in service 186 street hydrants, 51 of which have been added this year. For location of the same I will refer to the report of the superintendent of the water works. There are also five private hydrants for fire service located as follows: One on the south-east side of residence of Theophilus King on Adams street, one on the south side of B. Johnson's lumber wharf, three at the Tubular Rivet works (Wollaston). The 52 hydrants that have been placed in position the past year and now ready for service are located as follows:

LOCATION OF HYDRANTS SET IN 1893.

Albertina street.

Bigelow street, north side of Town brook.

Center street, corner of Kent street.

Center street, opposite Station street.

Charles street, opposite Silver street.

Chubbuck street, opposite Totman's house.

Chubbuck street, corner of South street.

Federal avenue, corner of Goddard street.
 Federal avenue, corner of Presidents avenue.
 Felton street, corner of Glover avenue.
 Freeman street, near O. H. Skinner's house.
 Glencoe place, north of New road.
 High street, corner of Bennington street.
 Holmes street, corner of Moscow street.
 Howard avenue, opposite S. B. Duffield's house.
 Howard street, corner of South street.
 Howard street, opposite Winter street.
 Howard street, corner of Howard avenue.
 Intervale street, corner of Center street.
 Kent street, between Center and Town Hill streets.
 Liberty street, corner of Center street.
 Lincoln avenue, corner of Winthrop avenue.
 Madison street, corner of Glover's place.
 Main street, corner of Oak street.
 Mill street, corner of Pond street.
 Nelson street, corner of Carlmark street.
 Newbury avenue, corner of Atlantic avenue.
 Newbury avenue, corner of Botolph street.
 New road, opposite Glencoe place.
 New road, corner of South street.
 Old Colony avenue, corner of Glover's place.
 Quincy avenue, corner of New road.
 Rawson road, near T. H. Kingston's house.
 Rawson road, corner of
 Rodman street, corner of Plain street.
 Silver street, corner of Hill street.
 Smith street, corner of Prospect Hill street.
 South street, opposite C. Jones' house.
 Squantum street, corner of Billings street.
 Squantum street, corner of Atlantic street.
 Standish avenue, opposite Warren avenue.
 Standish avenue, opposite Old Colony avenue.
 Station street, opposite Wilson street.
 Town Hill street, corner of Kent street.
 Trafford street, opposite Plain street.

Warren avenue, corner of Old Colony avenue.

Water street, corner of Quincy street.

Willard street, at Belknap square.

Willard street, corner of Bates avenue.

Willard street, near T. F. Mannex's works.

Winthrop avenue, corner of Marion street.

The Houghs Neck district still remains unprotected as far as water for fire service goes. It appears to the Chief Engineer that the amount of property at that place demands better protection, and I will again recommend that water mains of sufficient size be extended to said Houghs Neck, and hydrants necessary to protect said property be placed in proper position and at as early a date as possible.

RESERVOIRS.

There still remain sixteen reservoirs, ten of which are supposed to be self-filling and from the date of October 25 to December 11 were in their usual condition, which was only fair. As I have before stated I have but little confidence in them (with the exception of three or four) and they were used only when I could do no better.

FIRE ALARM.

The fire alarm is cared for by our old standby Gilbert M. Wight and the good and efficient manner in which he has performed his duty is a credit to him. This branch of the service is now in good working order. A new six-circuit repeater has been added and placed in position and the line divided into four circuits. The service has been extended to Houghs Neck and two signal boxes placed in that line. There have been six signal boxes added the past year which are located as follows :

- 12 Sea street corner of Palmer.
- 14 Houghs Neck engine house.
- 24 Quincy City Hospital.
- 31 Glencoe place and New road.
- 32 Independence avenue and Franklin street.
- 36 Corner Pleasant and Quincy streets.

FIRE ALARM CIRCUIT.

There is at this time about 50 miles of wire in the fire alarm circuit, one six-circuit repeater, seven galvanometers, one break key, one six-circuit switch board, six lightning arresters, 150 jars of battery, one indicator and gong, one automatic steam whistle attachment, four bell strikers, eight tappers, four gongs and forty signal boxes located as follows :

- 12 Sea street, corner Palmer street.
- 14 Sea street, Houghs Neck engine house.
- 21 Granite street, corner Cranch place.
- 23 Hancock street, opposite Cottage avenue.
- 24 Adams street, corner Whitwell street.
- 25 Canal street, corner Newcomb street.
- 26 Hancock street, on Stone church.
- 28 Hancock street, corner Greenleaf street.
- 31 New road, corner Glencoe place.
- 32 Franklin street, corner Independence avenue.
- 34 Union street, corner Main street.
- 35 Hancock street, corner School street.
- 36 Pleasant street, corner Quincy street.
- 37 Franklin street, corner Water street.
- 38 Liberty street, corner Plain street.
- 39 Penn street, near Liberty street.
- 41 Granite street, corner School street.
- 42 Granite street, corner Copeland street.
- 43 Copeland street, corner Common street.
- 45 Crescent street, corner Willard street.
- 46 Copeland street, on Hose 3 house.
- 47 Bates avenue, corner Grove street.
- 48 Willard street, corner Robertson street.
- 49 Willard street, corner Larry place.
- 51 Tubular Rivet works off Hancock street.
- 52 Farrington street, corner Elmwood avenue.
- 53 Warren avenue, corner Winthrop avenue.
- 54 Hancock street, corner Fenno street.

- 56 Wollaston Hotel, corner Newport ave. and Beale street.
- 57 Beach street, corner Willow street.
- 58 Adams street, corner Beale street.
- 59 Beale street, corner Central avenue.
- 61 Hancock street, corner Squantum street.
- 62 Hancock street, corner Atlantic street.
- 64 Newbury avenue, corner Billings street.
- 68 At Squantum.
- 71 Washington street, corner Mill street.
- 72 Washington street, corner South street.
- 73 Howard street, corner Winter street.
- 75 Main street, corner Sumner street.
- 135 Weymouth.
- 137 Braintree.
- 159 Milton.

Second Alarm,—Ten blows, followed by box number.

General Alarm,—Twelve blows, followed by box number.

Recall,—Two blows: "fire all out."

One Session School,—2-2 three times.

Test,—One blow, 7 A. M., 5 P. M.

Three blows calls Chief to the Central Station.

Police Call,—3 three times.

The addition of several fire alarm signal boxes is always an advantage and I would recommend that at least three be added and located as follows: One at the corner of Washington and Wharf streets, one at the junction of Cross and Common streets and one on Elm street at the corner of South street. I would also recommend a steam whistle attachment to be placed on the power station of the Quincy & Boston street railway at Quincy Point. Number three circuit at the present time is too large and I would recommend that it be divided, and another circuit added as this can now be done at a small cost as the present repeater will admit of the same.

TELEPHONE.

The Central Fire Station, City Hall and the residence of the Chief Engineer are connected by telephone (metallic circuit) and the service has been excellent, the operators having always been willing and obliging in transmitting messages when called upon to do so. The line men have also attended to their duty better than ever before since I have been inspector of wires.

HORSES.

The horses of the department are seven in number and are all in good health and good condition at this date. I believe that permanent horses to haul all pieces of fire apparatus would be of great service and add greatly to the efficiency of the department and I would recommend the same be done at the earliest possible date. The horse used to haul Hose 3, belongs to the Highway department and at times is too far from the fire station. If as I have stated in previous reports this horse could be kept within one half mile of the station it would be of better service, although up to the present time it has always got to fires as quick as could possibly be expected.

GENERAL REMARKS.

For the cost of running the department, expenditures, etc., see the Auditor's report.

While I recognize the good service that has always been done by call members I believe that by the addition of permanent men and reducing the call force much better service would be obtained. The call men as a rule have a long distance to run in answer to an alarm, and the consequence is they are not fit to go to work or go into the smoke for some time after their arrival at a fire, therefore much valuable time is lost. With permanent men to arrive with the apparatus, and not tired or winded by long runs we would always have men ready to go to work immediately.

The building laws should be revised, and ordinances made more stringent than now, thereby reducing to a great extent the fire risk. -I would also recommend that the ordinance be changed so as to reduce the number of engineers to three the same as in Brockton, the ordinance to read (and the Charter if necessary) one Chief, one Deputy and one District Chief, or engineer.

Following will be found a number of interesting tables relating to fire matters as well as a list of fires in detail for the year 1893.

SUMMARY OF FIRES, LOSSES, ETC., FOR THE YEAR ENDING DEC. 31, 1893.

189

MONTH.	Bell Alarms.	Bell Alarms with fire loss.	Still Alarms.	Amount at risk.	Amount of loss.	Amount of Insurance.	Insurance Loss.	Loss to owners.
January,	0	0	0	\$20,125 00	\$4,612 00	\$16,750 00	\$3,522 00	\$1,990 00

Totals,	51	37	13	\$197,405 00	\$34,287 50	\$99,850 00	\$21,412 50	\$12,874 50

AGGREGATE FOR FIVE YEARS.

YEAR.	Number of Bell Alarms.	Alarms with Fire.	Amount of Risk.	Amount of Loss.	Insurance Loss.	Loss to Owners.
1889	25	20	\$64,440 00	\$44,985 00	\$9,921 00	\$35,064 00
1890	30	24	120,215 00	20,870 00	16,498 00	4,372 00
1891	27	22	169,450 00	11,400 00	5,485 50	5,914 50
1892	49	27	118,899 00	23,115 00	18,566 00	4,549 00
1893	51	37	197,405 00	34,287 50	21,412 50	12,874 50
Total	182	130	\$592,409 00	\$134,657 50	\$61,883 00	\$62,774 00

LOSSES AND INSURANCE.

Estimated value of property where fires have occurred, including buildings and contents	\$197,405 00
Amount of insurance on same	\$99,850 00
Amount of loss on same	\$34,287 50
Amount of insurance loss	\$21,412 50
Amount of loss to owners	\$12,874 50

THE ALARMS.

During the year ending Dec. 30, 1893, the several alarms recorded have been as follows:

Number of bell alarms	51
Number of bell alarms with fire loss	37
Number of bell alarms for assistance	3
Number of still alarms	13
Number of false alarms	3

DAY OF ALARMS.

Fires and alarms have occurred as follows during the past year:

Monday	8
Tuesday	7
Wednesday	9
Thursday	17
Friday	7
Saturday	9
Sunday	7
Total,	64

HOURS OF FIRES AND ALARMS.

Between midnight and 3 A. M.	3
Between 3 A. M. and 6 A. M.	1
Between 6 A. M. and 9 A. M.	3
Between 9 A. M. and 12 M.	8
Between 12 M. and 3 P. M.	7
Between 3 P. M. and 6 P. M.	17
Between 6 P. M. and 9 P. M.	12
Between 9 P. M. and midnight	13
Total	64

PERMANENT FORCE.

List of permanent force since acceptance of the City charter.

NAME.	Age at Appointment.	Appointed.	Resigned.	Discharged.
Charles F. Jones .	31	May 1, 1886.		
William Goodwin	39	May 1, 1886.		July 5, 1890.

Henry T. Brown .	28	May 1, 1888.		
Timothy B. Collins	33	July 28, 1888.		
Michael P. Barry .	28	June 16, 1890.		
Clifford Thayer .	22	July 5, 1890.	Feb. 21, 1891.	
T. J. H. Thayer .	58	Feb. 21, 1891.	Sept. 28, 1891	
Charles E. Bowker	45	Sept. 28, 1891.		Mar. 11, 1893
Charles P. Costa .	46	Mar. 11, 1893.		

THE FIRES OF 1893 IN DETAIL WERE:

FEBRUARY.

Feb. 27, Box 35, 7.50 P. M., caused by overturning of stove in Parish House of Christ's Church. No loss.

MARCH.

March 2, Box 42, 5.40 P. M., engine house of Franklin Hardwick & Son. Loss, \$25; insurance paid, \$25. Cause, defective chimney.

March 10, Box 38, 1.38 P. M., house of Napoleon Reed, Liberty street. Loss, \$50; insurance paid \$50. Cause, carelessness.

March 10, 3 blows, Chief's call, 5.40 P. M., aid requested from Boston.

March 10, Box 45, 11.45 P. M., St. Mary's hall, Willard street. Loss, \$121; insurance paid, \$121. Cause, over heated steampipe.

March 11, Box 34, 8.05 A. M., can of cement rear of John E. Drake & Co.'s manufactory. Alarm needless.

March 11, Box 34, 8.53 A. M., same fire. Alarm needless.

March 11, Box 62, 1.23 P. M., house on Water street owned by Owen Mahoney and occupied by James McCarran. Loss on building \$106; on contents \$5. Cause, rats and matches.

March 18, Box 56, 10.20 P. M., Gardner's block, Wollaston, occupied by C. H. Backus, A. L. Baker and others. Loss on building, \$1,700; insurance paid. Loss on contents, \$1,370; insurance paid, \$725. Cause, hot ashes.

March 19, Box 62, 4.45 A. M., storehouse of Jeremiah W. Donovan on Newbury street, Atlantic. Loss, \$840; insurance paid, \$800. Cause, spontaneous combustion.

March 30, 3.55 P. M., still alarm, grass fire on School street. No loss.

APRIL.

April 6, Box 45, 11.26 P. M., house owned by the O. T. Rogers Granite Co., off Willard street. Loss on building, \$500; insurance paid. Loss on contents, \$55. Cause, overturned oil lamp.

April 6, Box 48, 11.42 P. M., same fire.

April 6, 2 A. M., still alarm, hut of Eugene Nye at Norfolk Downs. Loss, \$25. Cause, incendiary.

April 13, Box 56, 9.52 P. M., house on Grand View avenue owned by Charles R. Sherman and occupied by B. F. Floyd. Loss on building, \$5,000; insurance paid, \$3,500; loss on contents, \$3,000; insurance paid, \$2,500. Cause, heating apparatus.

April 13, still alarm 8 P. M., office of Haverhan & Son on Robertson street. Loss, \$25. Cause, incendiary.

April 19, Box 64, 9.50 P. M., house of Charles R. Safford, Atlantic. Loss, \$66; insurance paid. Cause, oil lamp.

April 27, Box 26, 10.57 P. M., Street Railway building; Loss, \$45; insurance paid.

April 29, Box 51, 9.55 P. M., false alarm.

MAY.

May 11, Box 46, 4.43 P. M., dog house on West street. No loss. Cause, children and matches.

May 21, Box 62, 3.15 P. M., Neponset bridge. No loss.

May 25, Box 47, 4.20 P. M., outbuilding of Patrick Ford on Grove street. Loss, \$10. Cause, children and matches.

May 12, 8.50 P. M., still alarm, Chickatawbut hill.

JUNE.

June 3, Box 64, 3.27 P. M., stable of LeRoy S. Carter on Squantum street. Loss, \$2,200; insurance paid, \$1,000. Cause, cigar ashes.

June 5, Box 48, 11.35 A. M., house of Granite Railway Co. occupied by Isaac Sloan. Loss on building, \$27.50; insurance paid. Loss on contents, \$25. Cause, spontaneous combustion.

June 8, 10.30 P. M., still alarm, chimney of house of R. Courtney on Marsh street.

June 8, 9.30 A. M., still alarm, house of Phillip Garrity on Willard street. Loss, \$100; insurance paid. Cause, boys and matches.

JULY.

July 3, Box 48, 11.12 A. M., house of Granite Railway Co., occupied by William Keenan. Loss on building, \$30; insurance paid. Loss on contents, \$15. Cause, fire cracker.

July 3, Box 49, 10.48 P. M., engine house of John Cashman. Loss \$75. Cause, incendiary.

July 3, Box 42, 10.55 P. M., false alarm.

July 4, Box 26, 1.18 A. M., out buildings of Adams Academy. Loss \$100. Cause, incendiary.

July 4, 10.45 A. M., still alarm. Bush fire near City Hospital.

July 4, Box 42, 11.12 A. M., stable of Edward Baker off Quarry street. Loss, \$215; insurance paid, \$150. Cause, incendiary.

July 5, Box 51, 10.47 P. M., car house of the Quincy & Boston Street Railway, occupied by the company, John A. Duggan, John McCarthy and others. Loss on building \$4,000, on Street Railway contents \$1,800. Insurance paid, \$5,800. Duggan's loss, \$2,500; insurance paid, \$1,000. McCarthy and others loss, \$435. Cause, struck by lightning.

July 6, Box 46, 11.52 A. M., partially burned building of heirs of Henry Doble on Copeland street. Loss, \$5. Cause, incendiary.

July 11, Box, 37, 4.55 P. M., grass fire near railroad track. No damage.

July 16, Box 42, 5.40 P. M., brush fire on Quarry street. No loss.

July 16, 6 P. M., still alarm. Chemical called to extinguish fire in ruins of Street Railway building.

July 22, Box 75, 9.40 P. M., small barn of John R. Graham on Sumner street. Loss \$325. Cause, struck by lightning.

July 25, 3.45 P. M., still alarm, small stable on Quincy avenue, occupied by James Sullivan. No loss.

July 26, 4.15 P. M., still alarm, stable of Charles Field on Pleasant street. No loss.

July 28, Box 21, 8.15 P. M., office of Owen & Son off Granite street. Loss, \$5; insurance paid. Cause, incendiary.

July 29, Box 41, 4.50 P. M., hen house of Alex B. Smith on School street. Loss, \$3. Cause, incendiary.

July 31, Box 42, 7.05 P. M., stable of Frank Brewer on Water street. No loss. Cause, electric wire.

SEPTEMBER

Sept. 10, 3 P. M., still alarm, house of E. C. Bumpus on Goffe street. Loss, \$205. Insurance paid. Cause, children and matches.

Sept. 13, Box 158, 2.17 A. M., aid sent to Milton.

Sept. 23, Box 54, 10.13 A. M., soap manufactory of Charles F. Bates & Co. Loss, \$485; insurance paid, \$485. Cause, sparks from chimney.

OCTOBER.

Oct. 1, Box 61, 3.06 P. M., house on Squantum street owned by N. G. Nickerson and occupied by R. A. and William Duggan. Loss on building, \$800; on contents, \$175; no insurance. Cause, open fireplace.

Oct. 2, Box 37, 2.09 P. M., barn of John P. Bigelow on Franklin street. No loss. Cause, children and matches.

Oct. 6, Box 62, 7.57 P. M., small barn of Michael Bowen on Newbury street. Loss, \$10; insurance paid, \$10. Cause, sparks from smoker's pipe.

Oct. 10, Box 26, 1.51 P. M., house occupied by Mrs. Drake on Saville street. No loss. Cause, sparks from chimney.

Oct. 11, Box 41, 11.43 A. M., house owned by the Pinel Bros. on Granite street, occupied by Charles Fosberg. No loss. Cause, children and matches.

Oct. 25, Box 46, 3.34 P. M., house of Albert Shackley on Cross street. No loss. Cause oil stove.

NOVEMBER.

Nov. 1, Box 38, 8.35 P. M., false alarm.

Nov. 2, Box 42, 2.53 P. M., brush fire on Quarry street.

Nov. 2, Box 49, 6.13 P. M., followed by Box 137 aid sent to Braintree.

Nov. 3, Box 52, 12.49 P. M., brush fire off Farrington street.

Nov. 6, Box 46, 3.09 P. M., stable of George Elcock on Copeland street. No loss. Cause, children and matches.

Nov. 7, Box 43, 8.20 P. M., unoccupied house of H. F. Doble on West street. Loss, \$300. Cause, incendiary.

Nov. 8, Box 23, 7.35 P. M., out building in rear of Patriot office. Loss, \$5. Cause, incendiary.

DECEMBER.

Dec. 6, 9 A. M., still alarm, house on Quincy avenue occupied by William A. Reed. No loss. Cause defective chimney.

Dec. 24, Box 42, 7.48 P. M., polishing shop of Fegan & Ballou on Quarry street. Loss, \$7,600; insurance paid, \$2,500. Cause, rats and matches.

CONCLUSION.

In conclusion I wish to thank the officers and members of the department for their successful efforts, and strict attention to the duties they have been called upon to perform. To the police department I am under many obligations for their willingness to perform the duties required of them, and to His Honor, Mayor Henry O. Fairbanks, I wish to express my heartfelt gratitude for the honorable treatment I have always received at his hands.

Very respectfully submitted,

WALTER H. RIPLEY,

Chief of Quincy Fire Department.

Quincy, Dec. 31, 1893.

QUINCY FIREMEN'S RELIEF ASSOCIATION.

Perhaps at this time it would not be out of place to mention the existence of this Association, its purpose, etc. I find the following in the clerk's record. "We, whose names are hereto subscribed, do by their agreement associate ourselves, with the intention to constitute a corporation according to the provisions of the 115 chapter of the Public Statutes of the Commonwealth of Massachusetts, and the acts in amendment thereof, and conditions thereto. The name by which the corporation shall be known is Quincy Firemen's Relief Association. The purpose for which the corporation is constituted is to provide aid and relief to its members disabled while in the discharge of their duty as members of the Fire Department of the City of Quincy.

The place within which the corporation is established, or located is the town of Quincy within said Commonwealth. In witness thereof we have hereunto set our hands this thirteenth day of March in the year 1886.

Joseph M. Glover,	Franklin Curtis,
William C Seelye,	Peter J. Cahill,
Amos L. Litchfield,	Luther Rogers,
Frank E. Burrell,	William F. Powers,
William Caldwell	Albert G. Olney,
Thomas H. Conlon,	Edward H. Richardson,
Arthur C. Merritt,	Frank L. Carlton,
John F. Conlon,	William A. Gavin.

The charter applied for by the above named gentlemen was granted and as appears on the records, "the first meeting was held April 17, 1886 at 8 o'clock, P. M., in the Hook and Ladder house on Canal street. Joseph M. Glover was chosen temporary chairman and William Caldwell, clerk.

By-laws for the government of said association were then read and accepted, after which the following officers were elected:

Vice President, Franklin Curtis.

Clerk, William Caldwell.

Treasurer, Joseph M. Glover.

Trustees, Thomas H. Conlon, Albert G. Olney, William F. Powers, Frank E. Burrell, Edward H. Richardson, Arthur C. Merritt, Amos L. Litchfield, William C. Seelye, William A. Gavin.

As the by-laws provides that the President is chosen from, and by the board of directors, the said board of directors met immediately after the adjournment of the association meeting and Amos L. Litchfield was chosen the first President."

This is in brief the history of the organization of the Quincy Firemen's Relief Association.

The standing of the Association Dec. 31, 1893, was as follows, as per Treasurer's book:

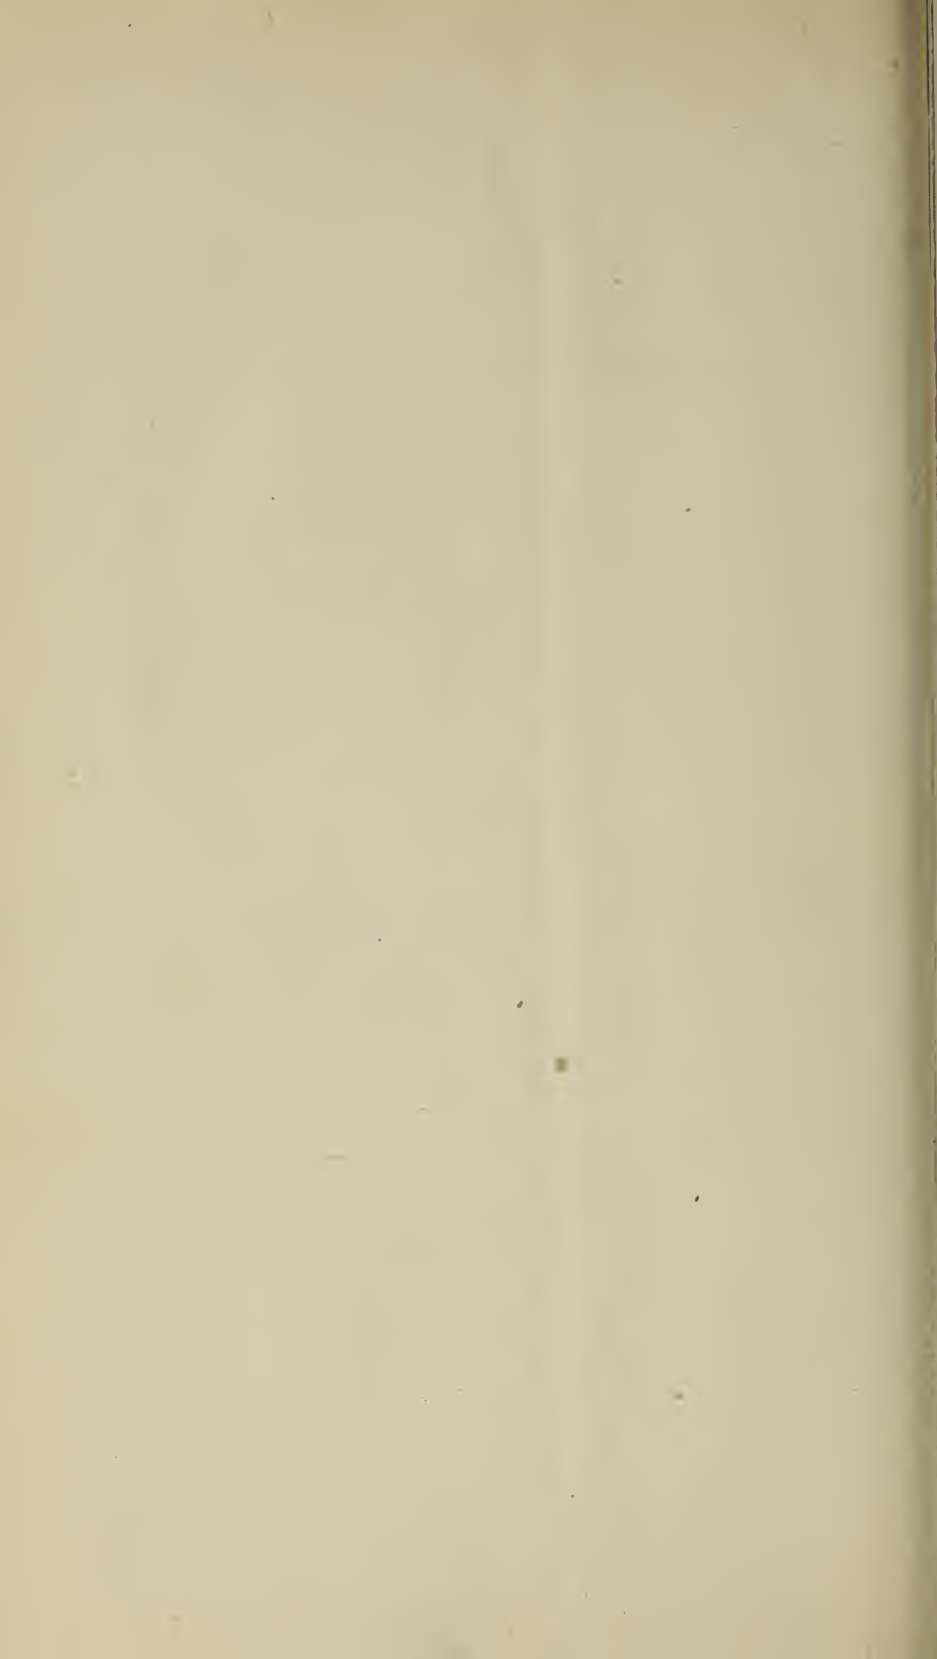

Land on School street	\$125 00
Buildings on same	800 83
Cash on deposit	1,196 59
Cash on hand	43 25
Total	<hr/> \$2,165 67

The only sure income the association has is the assessment of one dollar from each of its members annually, and the rent of the building on School street. The annual ball each year has so far been successful and has added considerably to the relief fund. The Old Colony railroad, kindly remembered us also, and presented us with a check for \$500 soon after the accident near Dimmock street bridge August 19, 1890. In conclusion I wish in behalf of the Association to thank all who have aided us in the past.

Very respectfully,

WALTER H. RIPLEY,

President of Q. F. R. A.

WATER DEPARTMENT.

To His Honor, the Mayor of the City of Quincy :

DEAR SIR :—The Board of Water Commissioners herewith submit their report for the year ending Dec. 31, 1893.

The rapid growth of the city and the additional demand for new extensions has increased the work in all branches of the department. The amount of cast-iron pipe laid this year was 35,570 feet or 6.73 miles. Numerous petitions could not be answered on account of lack of funds available for this purpose. The appropriation now at our disposal will enable the Board to lay considerable pipe the coming season. 51 hydrants have been added this year and 275 new services put in. Total number of service connections, 1850, of which 91 are supplied by meter. 13 new stand pipes for the use of the street department have been added. Reference to the tables given to the report of the Superintendent, will show details of pipe laid, hydrants and gates set, also the average daily amount of water pumped each month. The increase during the summer months is largely due to street and lawn sprinklers. More economy in the manner of using water for the above purposes would materially lessen the pumping expenses. But few complaints have been received by the Board as to the quality of the water. In most cases these were probably due to the shutting off and turning on of the water incidental to the laying of new mains.

There has been a large increase in the amounts received from sale of water, the gross receipts for the year being \$36,660.41. The total expended for maintenance account (exclusive of interest, was \$11,370.96, which deducted leaves a balance received more than expended of \$25,269.45. This

increase in the income is due largely to the policy adopted by the Board of extending the mains. We estimate the probable gross receipts for the year 1894 at \$40,000, and the amount required for maintenance \$14,000, leaving a net income of about \$26,000, or over 4 per cent on the net cost of the plant to date. That the plant will be self-sustaining in the near future there is no question. The schedule rates charged for water are the same as used by the Quincy Water Company and are higher than those of most city supplies. The Board propose to make a moderate reduction in the schedule rates to take effect July 1, 1894.

No serious leak has occurred in the mains or house supplies, and no accident has happened to the pumping machinery. Our supply of water has been sufficient to meet all demands and we were not obliged, as were many places, to limit the amount used. At the same time the large daily consumption, and the demands to be provided for in the future, convince us that action in relation to a larger storage capacity for water ought not to be longer deferred. A special appropriation will be required if the preliminary work is to begin the coming year.

WATER SHED.

The importance of protecting the water shed from all sources of pollution is evident to all. The lands recently taken by the Commonwealth for park purposes, include a large area that drains into the storage basin and also a large part of the Blue Hill River basin. The taking of these lands will protect for all time, this portion of our drainage area. More should be done in this line. Eventually the city should own or control all the lands bordering on the brook leading to the storage basin.

ABRIDGED STATEMENT.

Of income and expenditures from June 1, 1892, to Dec. 31, 1893.

EXPENDED.

Water Commissioners.

Report of Superintendent.

To the Board of Water Commissioners of Quincy :

GENTLEMEN :—The report of the details of the work of the department done under your direction by the Superintendent for the year ending December 31, 1893, is respectfully presented.

The supply of water has been ample for the year notwithstanding the unusual and extravagant use of lawn hose during the warm weather. January 1st, the level of the water in the reservoir was 3.6 feet below the overflow and rose gradually till February 24th, when the water was overflowing one-tenth of a foot. From this time till June 2nd, the water was wasted either by way of the overflow or through the waste gate at the bottom of the reservoir. From June 2nd there was a gradual loss till December 4th, when the water was 7.18 feet below the overflow, or 1.18 feet below the lowest point in 1892. The diagram shows the height of the water for each month in the year.

The total consumption for the year was 266,264,099 gallons, a daily average of 729,490 gallons. An increase of 127,556 over the daily average consumption of 1892. The maximum consumption was 1,322,522 gallons, August 3rd, and the minimum consumption was 494,822 gallons, January 6th. A comparison of the daily average consumption with that of 1892 may be of interest.

The rainfall as measured at the pumping station was 40.55 inches.

DAILY AVERAGE CONSUMPTION.

The daily average consumption in gallons is given by months for 1892 and 1893.

	1892.	1893.
January	491,164	593,892
February	509,583	592,859
March	535,854	636,674

	1892.	1893.
April	541,348	619,433
May	549,878	658,774
June	654,445	804,757
July	837,704	1,019,338
August	750,259	915,400
September	583,735	804,241
October	583,624	760,648
November	584,955	680,724
December	593,308	653,638

RAINFALL.

Record of rainfall in inches, as measured at reservoir and pumping station since January, 1888.

Total	57.17	54.40	49.59	47.31	35.58	40.55

To November, 1888, was measured at the reservoir, in Braintree.

From November, 1888, was measured at the pumping station by Mr. Spear.

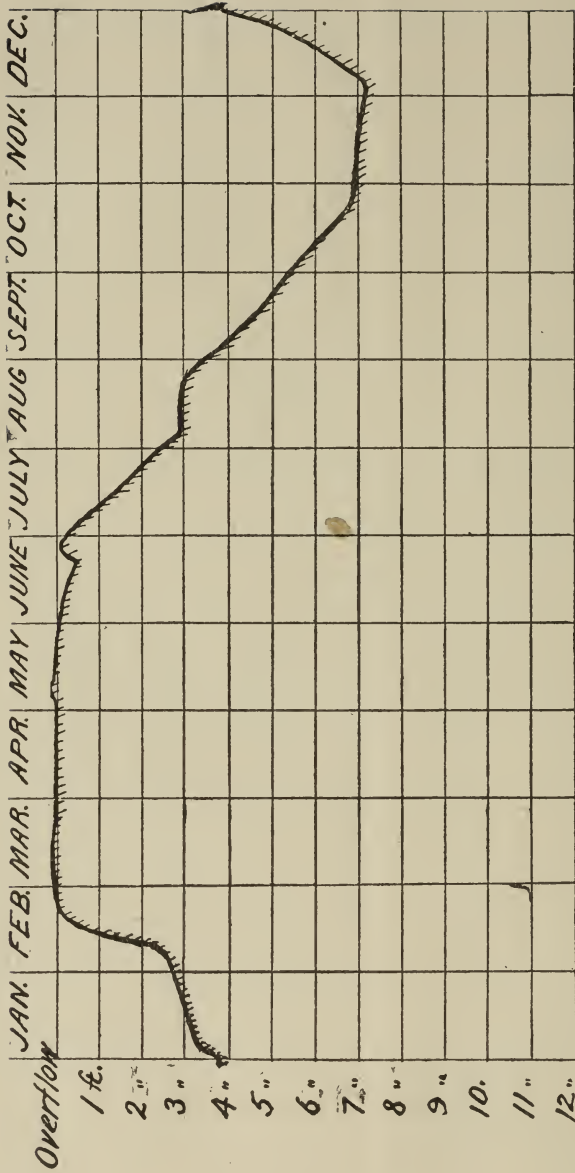

DIAGRAM SHOWING THE LEVEL OF THE WATER IN STORAGE BASIN FROM JAN. 1 TO DEC. 31, 1893.

ANALYSIS, CONTRACTS, ETC.

A chemical analysis of the water has been made under the direction of the State Board of Health, every month since the reservoir has been in use. F. P. Stearns, Esq., Chief Engineer of the Board has kindly furnished the results of these examinations for the year, which are given in this report.

A contract was made May 25, with the Radford Pipe & Foundry Company, of Cincinnati, Ohio, to furnish and deliver in Quincy, about 700 tons of pipe. Special castings were made by the Radford Pipe & Foundry Company, and The Builders Iron Foundry, of Providence, Rhode Island.

The proposal of the Chapman Valve Manufacturing Company to furnish hydrants and valves was accepted.

A contract was made with John Cashman of Quincy, for trenching and laying of the pipe and setting hydrants.

The bid of J. F. Sheppard & Sons, to furnish coal for the Pumping Station, was accepted.

 MAINTENANCE ACCOUNT.

RECEIPTS AND EXPENDITURES.

Appropriation	\$12,140 00

------------------	-------------------

CONSTRUCTION.

RECEIPTS.

Balance from 1892	\$834 85
Appropriation	30,000 00
Receipts less amount appropriated for maintenance	24,520 41
Total	<hr/> \$55,355 26

EXPENDITURES.

Pipe and special castings	\$23,476 55
Laying pipe	16,199 68
Hydrants, valves and boxes service pipe and fittings	3,773 67
Total	<hr/> \$51,382 17
Balance unexpended	\$3,973 09
Amount due on contract	1,941 65
Amount available for 1894	<hr/> \$2,031 44

The amount collected by the City Treasurer and credited to this department is \$36,660.41. Of this amount \$12,140.00 was appropriated by the City Council for maintenance.

Water was turned off from 18 places for non-payment of bills and turned on again after payment of all charges and the penalty of \$2.00. Water remains turned off at four places.

The mains have been extended 35,570 feet or 6.73 miles. Total number of miles of pipe to date 44.81. The number of hydrants set is 51, number of hydrants now in use 186. 64 gates were set making 450 now in use.

The location and description of pipe laid, hydrants and gates set will be found in the table. Also a table showing the length and size of pipe laid to December 31, 1893.

PIPE ON HAND.

The amount of pipe on hand and charged to construction account of 1893 is

1104 feet of 16 inch.

240 feet of 12 inch.

7716 feet of 8 inch.

60 feet of 6 inch.

24 feet of 4 inch.

also 38 hydrants and 31 gates.

275 applications for services were received making the whole number of applications to the present time, 1889. Of this number 39 applications have been cancelled or the services discontinued. The number of services to date is 1850.

Number of meters set, 24.

Number of meters in use, 91.

Respectfully submitted,

F. E. HALL, Supt.

December 31, 1893.

Summary of Statistics.

As recommended by the New England Water Works Association.

QUINCY WATER WORKS.

NORFOLK COUNTY, STATE OF MASSACHUSETTS.

Population, by census of 1890, 16,726.

Date of construction, 1883-1884.

Owned by City of Quincy.

Source of supply, reservoir in Town of Braintree and well.

Mode of supply, pumping direct and to stand pipe.

PUMPING.

1. Builders of pumping machinery, Deane Steam Pump Company.

2. Description of coal used.

b. Bituminous.

e. Price per ton delivered, \$4.60.

f. Percentage of ash, 9.45.

g. Wood, price per cord, \$4.75.

3. Coal consumed for the year in pounds, 1,047,812.

4. Pounds of wood consumed, 680.

5. Total fuel consumed for the year in pounds, 1,048,492.

6. Total pumpage for year in gallons, 266,264,099.

7. Average static head against which pumps work, 205.44.

8. Average dynamic head against which pumps work, 210.

9. Number of gallons pumped per pound of coal(3), 254.

10. Duty, 44,476,728=

$$\frac{\text{Gallons pumped (6)} \times 8, 34 \times 100 \times \text{dynamic head (8)}}{\text{Total fuel consumed (5)}}$$

COST OF PUMPING.

Figured on pumping station expenses, viz., \$5,068.21.

11. Per million gallons raised against dynamic head into
 - c. Stand pipe, }
 - d. Direct, } \$19.03.
12. Per million gallons raised one foot high (dynamic) \$0.09.

COST OF PUMPING.

Figured on total maintenance, viz., \$14,108.04.

13. Per million gallons raised against dynamic head into
 - c. Stand pipe, }
 - d. Direct. } \$52.98.
14. Per million gallons raised one foot high (dynamic),
\$0.252.

CONSUMPTION.

1. Estimated total population at date, 20,000.
2. Estimated population on lines of pipe at date, 14,000.
3. Estimated population supplied at date, 10,546.
4. Total number of gallons consumed for year, 266,264,099.
5. Passed through domestic meters, 4,006,582 gals. or .015 per cent.
6. Passed through manufacturing meters, 13,002,180 gals. or .048 per cent.
7. Average daily consumption, 729,490.
8. Gallons per day to each inhabitant (1), 36.
9. Gallons per day to each consumer (3), 69.
10. Gallons per day to each tap (Distribution, 22), 386.

DISTRIBUTION, — MAINS.

1. Kind of pipe used, wrought iron, kalamein, and cast iron.
2. Sizes, from 2 inch to 20 inch.
3. Extended, 35,570 feet.
4. Discontinued, 490 feet.
5. Total now in use, 44.84 miles.
6. Cost of repairs per mile, \$5.41.
7. Number of leaks per mile, .7
8. Small distribution pipes, less than four inches, total length, 26,452 feet.
9. Hydrants added, 51.
10. Number now in use, 186.
11. Stop gates added, 64.
12. Number now in use, 450.
13. Small stop gates, less than four inches total, 93.
14. Number of blow-off gates, 9.
15. Range of pressure on mains at center for day and night, 70 to 80 pounds.

SERVICES.

16. Lead and galvanized iron.
17. From $\frac{5}{8}$ inches to 2 inches.
21. Service taps added, 275.
22. Number now in use, 1889.
23. Average length of service, 19 feet.
25. Meters added, 24.
26. Number now in use, 91.

REPORT OF WOODWARD MANAGERS.

To Henry O. Fairbanks, Mayor.

The Board of Managers of the Woodward Fund herewith submit their annual report, together with the financial condition of the fund.

In September, 1892, the Board, realizing that the time was near at hand when the school as proposed under the provisions of the will of Dr. Woodward should be established, requested the gentlemen who were to have charge of same, to present their views in regard to the general plan for a building. As a result of several conferences with the Directors, the Board engaged the services of James Murray, architect, to prepare the plan and specifications for a brick building.

These plans were submitted to several contractors, but the proposals when received were deemed in the opinion of the Board, as unsatisfactory, and the above plans were revised and again submitted to the contractors. The second estimates for the proposed building were too high in the opinion of the Board, and in view of the fact, that the Board of Directors had not settled on any definite course of instruction, and could not, until the views of the Principal had been ascertained, it was not considered wise to expend a large amount of the fund in a building, believing that after the school had been established a few years, the requirements as to the arrangement of the rooms would be better known.

The Board had also duly considered the 6 per cent. clause in the will and had received the advice of eminent counsel in Boston that it was perfectly safe to go on with the construction

of a suitable building as in their opinion the city would retain the fund. The Board realizing that these opinions were not final, voted to request J. W. McAnarney, Esq., to take the necessary steps to secure an opinion of the Supreme Court upon several questions on which the Board of Directors desired information.

Pending the consideration of the questions by the Supreme Court, this Board decided that it would be for the best interest of all, to erect a moderate cost building which would be suitable for a school, until such time as growth and general needs would demand a permanent structure, and the Board engaged the services of E. G. Thayer, Esq., to prepare the plans, after he had first submitted several sketches to the Board.

These plans were submitted to the different builders of the city, and bids were received from several gentlemen, and after carefully considering all questions, especially the need of having the building erected in a few months, the Board decided to place the construction of the building in the charge of Stephen Moxon, Esq., and the building, was completed December 1, 1893, and was soon after placed in charge of the Directors. The cost of same will be found in our financial statement.

The questions submitted and the decision of the Court are also added, as matter of future reference.

Respectfully submitted,

H. O. FAIRBANKS,
BRYANT N. ADAMS,
JOHN O. HALL,
CHRISTOPHER A. SPEAR,
GEORGE L. GILL.

Board of Managers.

DECISION OF COURT.

The instructions asked by the City relative to the Woodward will and the decision of Judge Holmes of the Supreme Court are given in full below :

THE INSTRUCTIONS ASKED.

1. Whether it (the City) can safely invest any part or the whole of the property of said fund in the purchase or construction of a suitable building for the use of said school.

2. Is this complainant obliged at all hazards and in any event to guarantee said fund shall be so invested as to bear interest at the rate provided in said will, and in case said fund is not "guaranteed" with said interest under said devises either of them, providing it exercises due care and diligence in the endeavor to invest the same so as to bear interest at that rate ?

3. If the proviso as to guaranty of interest is binding on this complainant, does it require it to guarantee interest on such part of said fund as may be reasonably invested in land, buildings and appliances for the use of said school.

4. Has this complainant authority to raise money by the taxation of its inhabitants for the purpose of guaranteeing interest as provided in said will or for the support of said school ?

5. Is the provision in said will restricting the use of said school to the education of females born in Quincy a valid restriction, and will it prevent the attendance at the same of females of the proper age, residence in Quincy, but not born therein.

6. If the restriction referred to in the fifth prayer for instruction is valid, does it prevent the incidental use of said school by females of proper age, resident in Quincy, but not born therein, upon payment for tuition?

7. Under the provisions of said will are females of the proper age born in Quincy but not resident therein, entitled to attend said school.

8. Can girls of proper age who do not reside in Quincy be permitted to attend said school by paying for their tuitions?

9. For such other and further instructions in the premises as may to this honorable court seem meet.

THE COURT SAYS:

"This is a bill for instructions brought by the City of Quincy as trustee under the will of Ebenezer Woodward of property devised to it upon certain charitable trusts. The trustees of Dartmouth College, to whom the property is limited over in certain events, are made defendants, and, although no instructions are asked on that point, they set up a claim to the property on the ground that the plaintiff has broken the conditions imposed by the will. Perhaps under the decisions in this state, instructions could be asked as to whether there had been a forfeiture. *Fairbanks v. Belknap*, 135 Mass. 179, 184. When trustees are allowed to maintain a bill for instructions upon a question in which they are interested they are allowed to have their interests represented, but by different counsel from those supporting the bill. *Batchelder*, petitioner, 147 Mass. 465, 471. But if that rule would apply to a case like the present, still as the question arises here the counsel signing the bill were the proper persons to argue it. The allegation of a forfeiture must be regarded as a plea in bar, which, if made out, would show reason for our refusing to give the instructions asked. Whether the prayer in the answer that the plaintiff may be ordered to transfer the fund to the defendants could be sustained under St. 1887, c. 383, §3, it is unnecessary to consider, inasmuch as in our opinion the facts agreed do not amount to a forfeiture."

The limitation over in the will is as follows: "If the town of Quincy refuses to accept the above property on the terms herein specified, or fail to comply with the words and intent of this will, as determined by good judges, or should surrender the property or use it for any other purpose than contemplated in this will, then I bequeath the said property to the Trustees of Dartmouth College, to be used by them in the manner they may think best for the promotion of science and literature." The gift reads "I give and bequeath to the town of Quincy in the Commonwealth of Massachusetts and County of Norfolk, in its corporate capacity, all my real estate in the town of Quincy, and all the pews I may own in the various meeting-houses or churches in and out of town, at my death, with the exception, etc.,

* * * * as a *Fund* for purposes to be hereafter mentioned, to be disposed of or kept as the town may think proper; the sales, together with the rents and profits and income, from whatever source obtained, to be kept as a perpetual fund guaranteed by the town with six per cent. forever, for the purposes to be hereinafter mentioned, viz. And then follow eleven clauses of directions including an independent devise to a third person, before the clause of forfeiture first above stated.

The town of Quincy did not refuse to accept the property. It did accept it. It has not surrendered the property or used it for any other purpose than those contemplated in the will.

“ The only breach of condition that can be urged with any plausibility as an existing ground of forfeiture is that the town has failed ‘to comply with the words and intent of the will as determined by good judges.’ The fact chiefly relied on as a failure to comply with the will is the alleged failure of the plaintiff to give such a guarantee as is required by the words last quoted. They are taken to require an express contract with some one not specified, guaranteeing 6 per cent. interest, as a condition precedent to the vesting of the gift, or, if the making of the contract is not such a condition, the capacity to make it, at least, is said to be so, on the principal of *Bullard v. Shirley*, 153 Mass. 559. The guarantee is said to be the consideration and inducement of the gift.

If we adopt a construction of the will approaching this, we should have to consider whether, since the town accepted the devise without reserve and thereby became bound to do what it lawfully could do to observe the requirements of the testator, it did not contract with the executors as required, (*Cary Library, v. Bliss*, 151 Mass. 364,) so far as it had power to do so, and whether the will could be taken to require any contract beyond what it was within the power of towns under the constitution and statutes to make. If the condition were construed to go beyond the powers of the town, the further question would arise whether it was not void. *Drury v. Natick*, 10 Allen, 169, 183. *Giles v. Boston Fatherless and Widow’ Society*, 10 Allen, 355, 357. *Jones v. Habersham*, 107, U. S. 174, 183. *MacDonough v. Murdoch*, 15 Howard, 367, 411, 412. We are of opinion that the

guaranty plays a much less important part in the testator's scheme than the defendant's argument assumes.

In the first place the word 'guaranteed' qualifies the word 'fund,' and the fund which is to be guaranteed is not the fund first mentioned in the words of the gift, consisting of real estate and pews, some of which, by clause ten, of the same article, cannot be sold or let for some years. But it is to be made up from sales, rents, profits and income. So long as the original real estate is kept there is no need of a guaranty of that, and none is required. The requirement, therefore, plainly is a condition subsequent, as the town could have no such fund until it had received and held the gift, for some time. Moreover, the provision does not express the object of the gift, as was the case in *Bullard v. Shirley*, but merely a means of securing the fund, so that it may be forthcoming for application to the object. It does not set forth the consideration, but merely an administrative detail.

Again what is to be guaranteed? Grammatically and primarily, the fund, and in our opinion, by a true construction, nothing else. The words, 'with 6 per cent.' might be taken, no doubt, to bring in interest also, but it seems to us more reasonable to regard these words as directing that the returns expected from the guaranteed fund estimated at what at the date of the will was a conservative rate of interest, also were to be kept and applied as set forth. It is impossible that the testator should have expected the town to guarantee interest on the whole of the fund, for the institute was to be built and furnished, and no source of money for these purposes was provided except the fund in question.

The testator cannot have meant that the money used for the building and plant should be guaranteed to yield six per cent. interest. So again he recommends the clearing out of a creek and the building of wharves. He cannot have expected a constant return to be guaranteed from money used in this way. But furthermore we are not to construe the will as imposing a condition which is contrary to law unless the language plainly has that meaning. We are not to assume without necessity that the testator either was ignorant of petty obvious law or defined

it in shaping the conditions of a scheme which he was anxious to have carried out. Grammatically, we construe 'with six per cent.' as qualifying 'kept,' and substantially as qualifying the application ordered, which may be expressed by adding to 'kept' the implied words 'and applied.' Limited as we have limited it, the word 'guaranteed' does not require any contract of the plaintiff, but is used in a popular sense to indicate that the fund is to be kept good and applied as directed.

It should be noticed that in clause 10, which is but a few lines before the limitation over, five things are mentioned, to each of which the testator expressly attaches forfeiture. Other wishes have been expressed with no such condition attached. This may not be conclusive as to the scope of the words "fail to comply with the words or intent of this will," but it goes far to show that forfeiture was not the sanction of every detail which the testator's careful forethought suggested.

Finally, it is questionable at least whether the words "as determined by good judges" do not mean that there must be a failure to comply with the intention expressed in the will after the intention has been declared judicially, before the shifting clause comes into operation. At least it is plain from the whole will that the great thing in the testator's mind, his dominant intent, was to establish the female institute, and the general intent gathered from all the words must prevail over any small detail which interferes with it unless clearly he makes exact compliance essential. Some conditions subsequent he has imposed in terms by clause 10 of article 5. But even if in a vague way the testator did have it in his mind that the town should guarantee interest at six per cent. on so much of the special fund as should not be appropriated towards the building and plant of the Institute, he has used no words so exact and definite as to create a forfeiture if it should fail to do what it has not power to do. See further *Stanley v. Colt*, 5 Wall. 119, 165, 166.

The will, after providing that the property "is to be perpetually managed by the Selectmen" of Quincy, provides further whenever the town becomes a city "then the government of said city to have the management of said property for the

benefit of said city," etc. The city has established a Board of Managers of the fund consisting of the Mayor and other city officials and one citizen not a member of the City Council. It is urged that this is a breach of condition. We perceive no condition and no breach. The fact that the city has borrowed from the fund and charged itself interest, although it may be open to animadversion, is not a forfeiture.

The opinion which we have expressed disposes of the second, third and fourth matters upon which instructions are asked, so that we are relieved from considering whether they are within the proper scope of a bill for instructions. With regard to the fifth, sixth, seventh and eighth matters it does not appear that any conflicting claims are made or are likely to be made in respect of them, and no statement is made in the bill which shows that the present disposition of the fund requires the instructions prayed. *Putnam v. Collamore*, 109 Mass. 509, 512. The language of the will is clear and the trustee asks whether of its own motion it is at liberty to disregard that language.

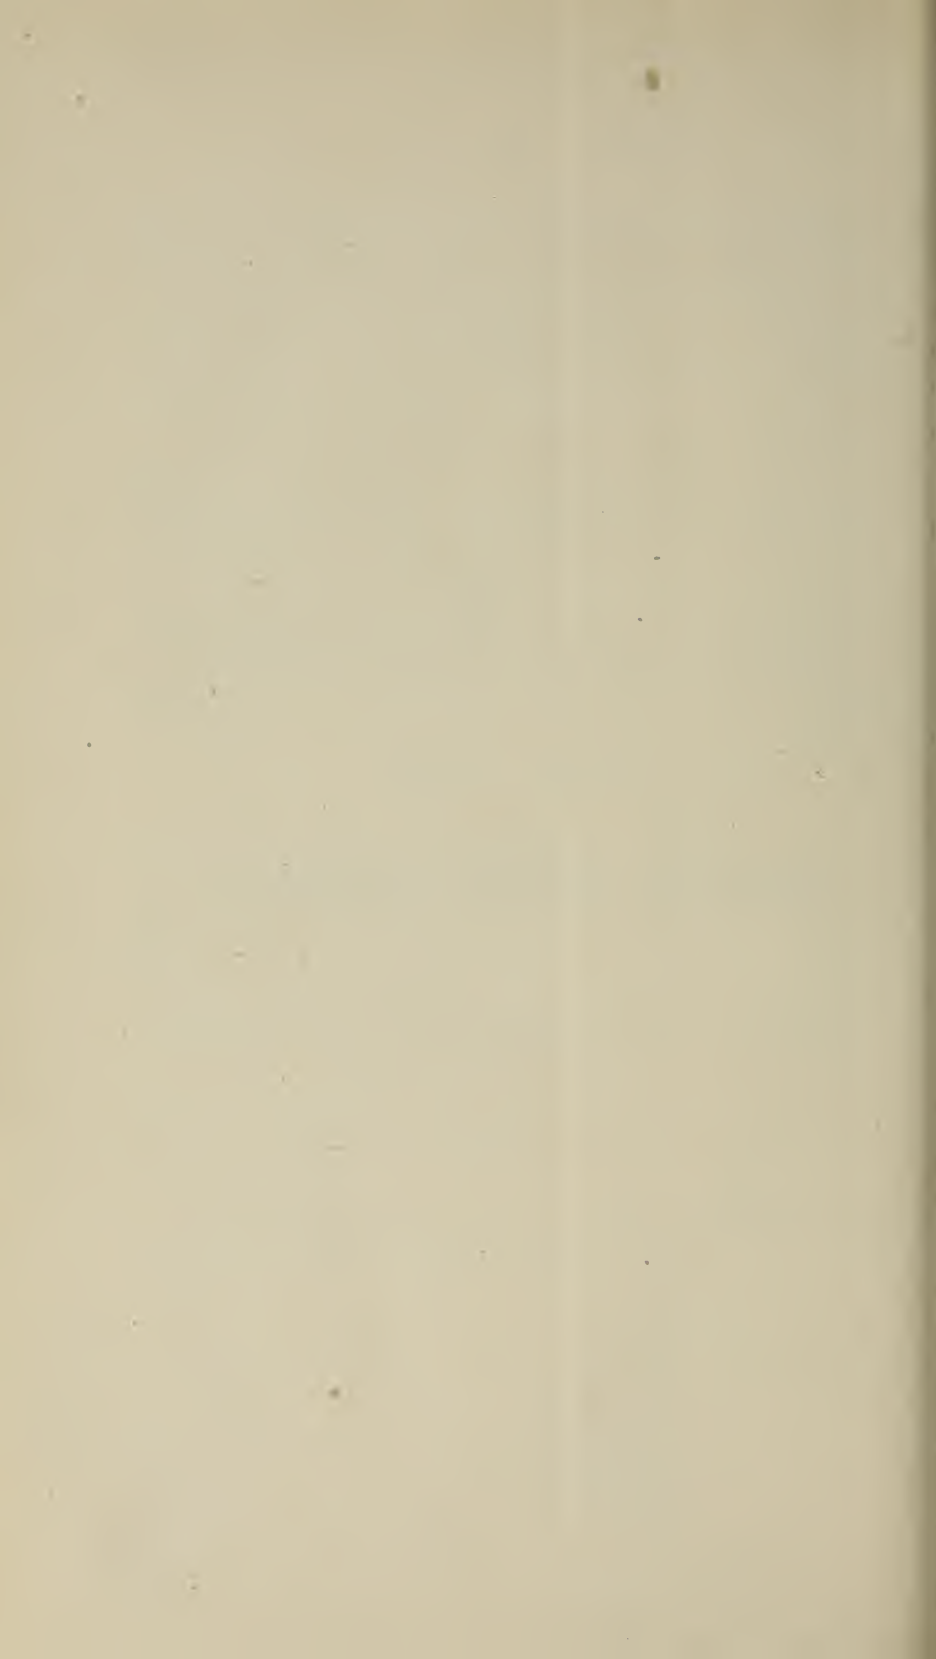

There remains only the first question, whether the plaintiff "can safely invest any part or the whole of the property of said fund in the purchase or construction of a suitable building or buildings for the use of said school." This we have answered already by implication. The purpose of the gift to the plaintiff is stated to be that at latest within twenty-five years from the testator's death, the managers of the fund "shall establish and continue" a Female Institute, to be located on land given to the town by the testator. This means that the managers of the fund are to apply a reasonable portion of it to the purchase or construction of a suitable building or buildings, and cannot be restricted or cut down by the general provision before referred to for the keeping of the fund "with six per cent." *Decree accordingly.*

J. E. Cotter, C. F. Jenney and J. W. McAnarney for Quincy;
Williams and Anderson for Dartmouth College.

REPORT OF SCHOOL COMMITTEE.

To the Citizens of Quincy:

The School Board herewith submits its report for the year 1893.

We still retain in the office of superintendent Mr. H. W. Lull, whose zeal, discretion, and sense of justice have been signally displayed, since his assumption of the task, two years ago and who, by his educational skill has been able to keep the schools of Quincy upon the high plane which they have occupied during the last twenty years.

It will be pleasing to our citizens to know that the excellence of our schools has been recognized in a prominent manner on two occasions during the past year. The report of Dr. J. M. Rice has classed our schools with those of Springfield and Brookline and puts them in advance of many other cities and towns whose pecuniary resources are in every way superior to ours. Moreover at the World's Fair held in Chicago, a medal with its accompanying diploma was awarded to the Quincy schools for excellence in work and specimens of that work have been asked for by the authorities of the city of Philadelphia with a view to the formation of a permanent educational exhibit.

The question of adjustment of salaries is ever a difficult and delicate one. Nevertheless in connection with the subject, we have found occasion to make two marked innovations. We have elevated the maximum salary of teachers occupying positions below that of principal in the grammar and primary grades from \$500 to \$550 per annum. This latter figure has been attained by a certain number of teachers in virtue of long and faithful service coupled with real professional merit. A further

advance to \$600 might not unreasonably be considered in the future. We have thought it well to fix at \$1,400 the maximum salary of grammar school principals; but this figure is to be secured only during the fifth year of service by means of an annual increment of \$100, the initial salary still remaining at \$1,000. By this means we hope to secure the continuance in work of valuable teachers as well as increased advantage which pupils derive from prolonged personal contact with a good master.

Without rehearsing here the story of the confined and altogether unsuitable quarters which hitherto have been provided for our High school children, we wish to express our sense of gratitude for the generous appropriation which our City Council has voted for the purpose of erecting a new building. This new High school, to be built by Mellen & Son of Worcester, under the architectural superintendence of Mr. Edmund G. Thayer, will be a thoroughly modern structure in every way adapted to the wants of the present day and with the enthusiastic corps of teachers who are serving us in that institution we can confidently promise to establish a school which will be in every way worthy of the City of Quincy and of its educational system.

For a detailed account of receipts and expenditures, as well as for a full and interesting report of the educational work of the year, we refer our citizens to the superintendent's report from which they will not fail to derive much gratification and profit.

Respectfully submitted,

School Committee.

REPORT OF THE SUPERINTENDENT.

To the School Committee of Quincy :

In accordance with the rules of the School Board the annual report of the Superintendent is now submitted for your consideration. It is the nineteenth report presented by a Superintendent and the forty-fourth of the series of school reports printed by the town or city of Quincy. In this review of the year 1893 a simple statement of those school matters that are of general interest will be found.

I. SCHOOL PROPERTY.

As the list of property published last year was complete, and as no new building has been erected during 1893, it will not be necessary to do more than give a brief summary. There are nine distinct schools, located in ten buildings, containing eighty-one rooms with seats for thirty-nine hundred pupils. The approximate valuation of these buildings and their grounds, together with two small pieces of land now unused, and of all furniture, books, apparatus, supplies, etc., is about \$321,000. There is an apparent increase of nearly \$15,000, owing to the fact that the assessors have raised the valuation of the land at West Quincy and at Wollaston.

To this total may be added \$15,000, the cost of the lot for the new High school. Furthermore, it is a great pleasure to record the action of the Council whereby \$62,000 have been appropriated for a new building for the High school.

No provision has yet been made to anticipate the future needs of Wollaston Park and Norfolk Downs, although the two schools at Wollaston and Atlantic have reached their limit.

Land should be purchased before its value increases and before the most desirable lots are sold. There are at this date 118 pupils of the Wollaston school living east of the New York, New Haven & Hartford railroad, and 58 of the Quincy school on the same side, but south of a line drawn from the railroad bridge at Norfolk Downs station directly east to the salt water.

It is to be regretted that the middle section of the Lincoln school is not so roofed and lighted that a ninth-room can now be finished on the third floor. The two sections of the lowest grade number 123 and fill two rooms. Therefore the seventh and eighth grades have only one room. One or the other of the teachers of these two grades must teach a part of the time in the open corridor. In April forty-three pupils were removed to the John Hancock school to relieve the pressure.

The same trouble regarding the highest grades applies to the John Hancock as well as to the Lincoln, but with this exception. The third floor of the John Hancock needs only the finishing to provide two excellent rooms at a moderate expense.

In the Willard the storeroom for supplies has been removed to one of the coat rooms, and the former room has been seated and is used for a primary class. There are now eighteen rooms on the first two floors, and no further accommodations can be provided below the third floor. If the extra rooms were finished at the John Hancock a new low grade Primary class could be organized there which would draw from both the Willard and the Lincoln.

II. TEACHERS.

An increased school population demands an increased teaching force. In the following table will be found five additional teachers. The extra man is in charge of the afternoon session of the High School; three of the women are employed in the seventh grades of the John Hancock, Lincoln and Willard; and one is assigned to the new room of the second grade in the Willard.

	1892		1893.	
	MEN	WOMEN	MEN	WOMEN
High School, Principal . . .	1	0	1	0
Other Teachers . . .	0	4	1	4
Grammar Schools, Principals . .	7	1	7	1
Other Teachers . . .	0	25	0	28
Primary Schools, Teachers . .	0	42	0	43
	<u>8</u>	<u>72</u>	<u>9</u>	<u>76</u>
Assistants . . .	0	14	0	14
	<u>8</u>	<u>86</u>	<u>9</u>	<u>90</u>
Special Teachers . . .	0	5	0	5
	<u>8</u>	<u>91</u>	<u>9</u>	<u>95</u>

III. PUPILS.

1. Whole number of different pupils registered . . .	4,114
2. Average number belonging	3,211
3. Average number attending	3,067
4. Ratio of attendance to membership	95.5
5. Pro rata of tardiness to average membership59

In the-table below will be found similar data for each year since the incorporation of Quincy as a city.

	1.	2.	3.	4.	5.
1889.	3,287	2,619	2,516	96	.36
1890.	3,432	2,698	2,587	95	.53
1891.	3,649	2,865	2,733	95	.59
1892.	3,724	*3,392	3,228	94.9	.53
1893.	4,114	*3,211	3,067	95.5	.59

*On the last school day of December, 1892, the number of actual members was 3,234; in December, 1893, the number was 3,330. It is evident that the confusion arising from the organization of the Lincoln and the re-organization of the John Hancock, and from the consequent transfer of pupils from other schools to them, has caused an error in the averages of 1892.

TRUANCY.

The need of one energetic truant officer who has some acquaintance with truancy laws, as well as with all the highways and byways of the city, is more imperative than ever before. Not only is the number of truants increasing, but there is too great a difference between the whole number of different pupils registered and the census returns of May. Too much time is spent by teachers in an attempt to do the work of a truant officer without the power that an officer of the law carries with him. The legislature will be asked at its next session to revise the truancy laws so that there can be no doubt as to the offence and the penalty.

IV. CENSUS.

The population of Quincy in 1890 was 16,723. The last estimate by the State Board of Health is 19,642, an estimate generally accepted is 20,000.

The census of May, 1893, is as follows :

Age.	Centre.	Point.	West.	South.	Atlantic.	Wollaston.	Total.
Five,	69	37	193	158	56	58	571
Six,	69	48	184	171	41	49	562

	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
	1889	1890	1891	1892	1893
South . . .	926	1,024	1,158	1,281	1,174
Centre . . .	481	485	522	522	557
Point . . .	353	325	337	357	358
West . . .	1,108	1,161	1,281	1,407	1,383
Wollaston . . .	313	332	365	416	446
Atlantic . . .	314	338	382	394	402
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total . . .	3,495	3,665	4,045	4,377	4,320

A comparison of the totals in this table will cause some surprise. The census this year was taken by D. Vinton Pierce, who has reported the births for the last two years, and who is familiar with all parts of the city. He declares that even after a second search in Wards III and IV, he cannot find more than the number reported. This result may be due : first, to an inaccurate total in 1892 ; second, to the same trouble in 1893 ; or third, to a real loss of school population. Mr. Pierce thinks that parents were careless last year in giving their children's ages, as many under five and over fourteen were included in the census of 1892. Mr. Pierce has kept a record of all cases of this nature in each district, and declares that when such deductions as are mentioned above, are made from the census of 1892, the census of this year shows an increase.

V. MONEY.

Valuation of Quincy, May, 1893	\$16,638,070 00
Total tax levy	\$273,947 51
Rate per thousand	\$15 80

APPROPRIATIONS.

	Spring.	Fall.	Total.
Salaries	\$52,525	\$2,250	\$54,775
Fuel	5,900		5,900
Janitors	4,434		4,434
Transportation	850		850
Miscellaneous	3,900	400	4,300
Books and Stationery	3,325		3,325
*Evening Drawing Schools	1,000		1,000
*Evening Common Schools	1,700		1,700
Sewing	500		500
Cooking	100		100
	<hr/> \$74,234	<hr/> \$2,650	<hr/> \$76,884

*A transfer of \$100 was made from Evening Common to Evening Drawing.

In accordance with section 34, paragraph C, of the City Charter, W. W. Ewell, Commissioner of Public Works, reports the following outlay for repair of school buildings:

High	\$19 50
Adams	244 19
Coddington	285 54
John Hancock	163 59
Lincoln	320 81
Quincy	98 86
Washington	677 77
Willard	1,531 85
Wollaston	199 95

The unusual amount charged to the Willard school is due to the fact that the higher part of the roof was not slated when the building was erected. During the summer the old covering was removed and the roof was slated.

At the Washington school three hard-wood floors were relaid and the building made safe.

Summary of expenditures for 1893.

	Expenditures.	Balances.
Salaries	\$54,698 64	\$76 36
Fuel	5,899 71	29
Janitors	4,434 00	00

Cooking	99 95	05
Total,	<u>\$76,741 53</u>	<u>\$142 47</u>

See appendix for itemized account.

VI. ADDITIONAL STATISTICS.

By the Fifty-sixth Annual Report of the Board of Education, Quincy holds the following rank, among the 351 towns and cities of the State and the 27 of the County.

Percentage of valuation appropriated to public schools. State, 137; County, 16.

Ratio of average attendance to the whole number of children between 5 and 15 years. State, 301; County, 23.

Comparative amount of money appropriated for each child between 5 and 15 years. State, 153; County, 21.

Number of pupils in the twelve grades in December.

Primary, I, 672.	II, 400.	III, 421.	IV, 402.
Grammar, V, 370.	VI, 314.	VII, 291.	VIII, 227.
High, IX, 124.	X, 67.	XI, 33.	XII, 25.

In December of 1892 there were:

Primary, I, 653.	II, 450.	III, 406.	IV, 393.
Grammar, V, 361.	VI, 319.	VII, 253.	VIII, 214.
High, IX, 86.	X, 48.	XI, 30.	XII, 19.

A comparison of the number in any grammar grade of last year with that next higher this year will reveal a decided shrinkage and shows that we still have to regret the loss of pupils at the age when they need a strong hand and mind to direct them in the paths they should enter. Their reading age is just beginning, and if they could be controlled for a year or two, and be given the right taste and habit by contact with teachers who realize their responsibilities and their opportunities, we should have better citizens and manlier men. These children will be able to answer easily all the demands and requirements of our Board of Registrars, and yet they will be more likely to be led than to lead, more willing to allow someone else to do their thinking for them than to do it themselves.

VII. SALARIES.

This year begins a new era in the history of salaries. The Board awoke to the fact that for years Quincy had been the source of supply for the schools of all the neighboring cities, to the profit of the said cities, but to the great detriment of Quincy. The Board felt that it had the support of all those citizens who have the welfare of the city at heart and therefore it acted promptly.

By the new scale the average salary now paid to the seventy-one teachers, excluding those of the High School, all principals and the specials, is \$470.77.

Six of the seventy-one teachers have served for more than fifteen years. Their services date from '55, '57, '65, '74, '75, and '78. The Board deemed these worthy of a special reward, not only for length of service, but for faithful and successful effort. These now receive \$550, as a token of appreciation.

Another change of the year established a new maximum for principals below the High School. The scale as now fixed begins with \$1,000 for the first year, and the salary increases by \$100 per year, until the maximum of \$1,400 is reached.

Last year there were twenty-three resignations; this, fourteen. Last year thirteen left to receive a larger salary; this year, seven.

See appendix for list of teachers, years of service, and resignations.

VIII. FUEL.

The excessive cold of last spring increased the fuel account about \$400. It was the desire of the Board this year to contract for a year's supply of coal in the summer and thus avoid the advanced prices current in the spring. The Council, early in the year, made an unusually generous appropriation for this purpose. The balance in July was sufficient to purchase for immediate delivery 671 tons at \$5.20. If the spring of '94 is not very severe, this amount will nearly suffice until July, '94.

IX. HIGH SCHOOL.

The needs of this school were set forth in the report of '92 in vigorous language. Many of our citizens at last became thoroughly aroused, lent the Board their influence, and the united efforts of both, together with the assistance of able men in the Council and in other departments of the city government, have secured a generous appropriation of \$62,000 for a new building. A very desirable piece of land for a site had already been purchased for \$15,000. The first sod was turned Monday, November 27. The building is to be finished before September of 1894.

The growth of the school this year has surpassed even the generous prophecy in the last report. When the doors were thrown open for the fall term 245 pupils presented themselves. It was impossible to dispose of the overflow, as last year, in the Adams building. As the new building seemed even at this time assured, it was not thought best to incur a great expense by fitting up additional quarters. The entering class was just one-half of the school. It was organized in four divisions, provided with three teachers and given the use of the old building for an afternoon session. The three remaining classes in care of three other teachers held their session from 8 until 12.30 o'clock. When we remember the many disadvantages and also the fact that as yet the course of study has received no enrichment, the large increase is surprising.

Of the 213 graduates of the Grammar schools, 123 entered the High. There are 227 in the Grammar classes that graduate next June. If the same proportion enters as did last September, if twenty-five graduate from the High, and if fifty, or even seventy, leave for various reasons, the school next fall will number more than three hundred pupils.

Of the 173 girls now enrolled, 84 were born in Quincy; but only three of this number have expressed a desire to attend the Woodward Institute.

Last June the class of '94, eighteen in number, received the first diplomas of the new four years' course. As there is now a first class of twenty-five we may consider that the course is well established.

The books offered for the best declamations, essays, and translations were competed for last April, and the exercises brought the school before the public in a very creditable way. The generous donors will offer similar rewards for 1894.

To the surprise and great pleasure of the friends and pupils of the school, George W. Morton, Esq., made a generous addition to the prizes of the contest of 1893.

For programmes of graduating, and prize speaking exercises, for names of recipients of prizes and data for the new contest, see appendix.

X. EVENING DRAWING SCHOOL.

This school is occupying the Hardwick Hall for the last season. A room has been provided for it in the plans of the new High School building where more modern conveniences will be provided.

Last April 8 certificates were presented to the members of the mechanical class and 11 to the freehand for one year's work. Also 4 diplomas to the mechanical and 3 to the freehand for two years' work.

Certificates and diplomas are given for the completion of a definite amount of work to the satisfaction of the Instructor in Drawing.

The average attendance for the year was: Mechanical, 17; freehand, 14.5. At different times in the year fourteen of the teachers or assistants of the day schools were enrolled.

XI. EVENING COMMON SCHOOLS.

Adams: Largest attendance of men, 88; of women, 20.
Smallest attendance of men, 6; of women, 1. Average attendance of men, 39.4; of women, 8.1; Average number of teachers, 4.5.

Willard: Largest attendance of men, 134; of women 6.
Smallest attendance of men, 29; of women, 0. Average number of men, 69.2; of women .95. Average number of teachers, 5.9.

The two schools have been open during the months of January, February, March, November and December. The number of sessions for each school is 47.

As many of the men are between twenty and thirty years of age and have a very limited English vocabulary even for conversation, a great deal of patient individual work is necessary on the part of the teachers.

The drafting of a set of regulations for the government of all the Evening Schools has been referred to the proper sub-committee. Another year it is to be hoped that a more regular and constant attendance will be enforced.

One of the Principals reports an increased attendance of graduates of our Grammar Schools and that excellent work has been done by them.

XII. GENERAL MEETINGS.

The general meetings have been continued as in the past. All teachers, assistants and trainers are expected to attend. The subjects discussed are intended to be of such general interest that all may find profit in them. The following eleven meetings have been held:

Jan. 17. Henry T. Bailey, Agent State Board of Education.

Psychology of the Quincy Course in Drawing.

Jan. 31. W. G. Corthell, Quincy School Board.

Reminiscences of European Travel.

Feb. 14. Dr. John A. Gordon, Quincy School Board.

Digestion.

- Feb. 28. Rupert F. Claflin, Cashier Granite National Bank.
Banking.
- March 14. John T. Prince, Agent State Board of Education.
School Habits.
- Sept. 5. H. W. Lull, Superintendent of Schools.
General Introduction to Work of the Year.
- Sept. 19. A. E. Winship, Editor Journal of Education.
Teachers' Reading.
- | | | |
|----------|---|---|
| Oct. 23. | } | Sylvester Brown, Principal Martin School, Boston. |
| Nov. 7. | | |
| Nov. 14. | | |
- Dec. 14. A. W. Edson, Agent State Board of Education.
Qualities and Characteristics of a Good Teacher.

XIII. PROMOTION BOOKS.

Every teacher keeps a book in which is recorded twice each term, six times per year, a general estimate of each pupil's scholarship and deportment. In addition the teachers are requested to make a careful statement of the child's mental, moral and physical condition, so that his work may be properly judged. The estimate in scholarship is not the result of particular written tests or special examinations given by teacher, principal or superintendent, but it is supposed to be a conscientious statement based on all the work and all the individual teacher knows of the particular child. Quincy is subject to so many changes in her teaching corps that it has been difficult at times to learn the exact status of a pupil's work. Now, however, the new teacher who enters after the first two months of the year will always find one or more records, and if he begins in May, he will have five records to help him determine the question of promotion in June.

XIV. LETTER WRITING.

During the past year all the pupils in Grades III, IV, V, VI, VII, VIII have written at particular times and also in accordance with definite instructions, seven letters on various subjects assigned by the Superintendent. These letters have

been inclosed in envelopes and properly addressed to designated persons. Those on Nature Work were addressed to Miss Brassill; on Temperance, to Mrs. Mary H. Hunt; on Our Dumb Animals, to George T. Angell; on Geography and History, to A. E. Winship, Editor of the Journal of Education; on Thanksgiving, to the special sub-committee of the School Board, and on general subjects, to the Superintendent. All these letters have shown the name, age, school and grade of the pupil and have been exchanged, grade for grade. As there are eight schools of full grade below the High, and as seven letters have been written, every grade has seen the work of all the corresponding grades in the city.

The pupils of grades I and II can do little in the fall term, but before the next June they are able to copy or write from memory choice gems of two, four, or six verses in addition to the name, age, school and grade.

It is hoped that such practice as that outlined above, will develop more power, confidence, and skill in nearly the only line in which a large majority will ever attempt original composition. Neatness, care, method, thought, handwriting, spelling, capitalization, punctuation and composition are constantly demanded, and it is expected that the inspection by all the other schools will be a strong incentive to each school to do its very best work. Illustration is required whenever possible, so that the pupil may realize the fact that drawing is a very practical study and that the *sketch* is a great help in conveying information.

XV. VISITS.

The sum total of visits during the year is 5,777. It is evident that the Quincy schools still stand well among educators, for this number includes visitors from all parts of the United States and from beyond the Atlantic. Even Dr. Rice, "the expert," who has criticised everywhere unsparingly, has been with us and has given us some little glory.

However, it is a cause of regret that this number of visitors includes a relatively small number of the parents of the pupils. Much of the friction that arises could be prevented if the father or mother would visit the school, see the aims, efforts and

methods of the teachers and would then co-operate with them. Misunderstandings are due in a great measure to gossip, to the vigorous imaginations of the pupils, and to ignorance of the real work of the school.

A visit, now and then, would be an excellent corrective and would increase the child's respect for his school, his teacher and his work, if the parents showed by their presence that they considered them worthy of their attention. It would also be an incentive to the teacher to do better work, if the parents would manifest such an interest.

XVI. THE TRAINING CLASS.

The class now numbers 40, though the total number of different members during the year is much larger. Unfortunately the class is looked upon as a "short cut" to the teacher's position. In a sense it certainly is, but if the trainer thereby throws away the added knowledge and thought training to be gained in a good Normal School, it is a most unfortunate loss. Doubtless there are many in and near Quincy, who would have found some way of securing a normal education, if this class did not exist, who will regret the loss after a few years. The road through the Quincy schools is shorter, but in the end, other things being equal, the normal graduate will become the better teacher and command a higher salary. The founder of this class agrees with this view. Because of these facts, the parents of the girls in the Quincy High School should send them, if in any way it is possible, to a first-class Normal School.

See Appendix.

XVII. SPECIAL STUDIES.

Drawing, Music, Nature Work and Sewing are now so integral a part of our school curriculum that "special" is almost a misnomer. These courses have been strengthened during the year by the special directors.

In Nature Work the regular teachers are getting a better grasp of the subject and in some cases are calling for extra work. This department is now more closely allied with the drawing to

the mutual profit of both kinds of work. It is also correlated with number work, spelling, dictation, language and writing.

As the first year's work in sewing was not finished until last June, there was little variety in it. At present Grades VI, VII and VIII are engaged in the second year's work and Grade V in the first. As the boys of Grades VII and VIII have gained that practical knowledge that was considered desirable, they are now excused. These boys are now occupied in some other way, while the girls are sewing. They should be in the shop, and at the bench learning the use of the common tools. Manual Training should be doing for the boys what sewing is for the girls. The basement of the Coddington School can accommodate all the boys of grades VII and VIII of the eight schools for one half-day lesson per week. Such a plan will necessitate an outlay for only one set of apparatus and for only one instructor.

If Quincy is to hold the position in the educational world that should be hers, she must strengthen herself in at least three places; in her secondary instruction, in the education of the hand in conjunction with the brain, and in the training of those whom she receives into the lowest Primary grade. The new High School building will be new as regards the building and also in the courses of instruction offered and will provide for the first need; Manual Training will develop the hand; and to the Kindergarten we must look for the training that will take the child at four years of age and give him to the lowest Primary grade at five in a condition to make a rapid stride in his work. A trial Kindergarten established within the triangle formed by the John Hancock, Lincoln and Willard Schools and near Brewer's Corner would be a most acceptable beginning.

Because of the limited appropriation and more limited accommodations of the High School, it was necessary, for the last two years, to teach cooking by the lecture method. The attempt has been as successful as was expected in the circumstances. Next year, if the same appropriation is made, and if all the money is saved until September, the girls of the first class can be assigned a room in the new building and then class and individual work can be done in the customary way.

See appendix for synopsis of Nature Work and of Sewing.

XVIII. EXHIBITS OF WORK.

IN June, in Boston, under the direction of the New England Conference of Educational Workers, an exhibition of Nature Work was held. The whole scheme of the six departments of the Quincy work was outlined by samples mounted on large card boards displayed in consecutive order; while on a table whole sets of classwork were neatly bound and displayed by grades and subjects. The exhibit was intentionally reduced in quantity so that examiners could more easily grasp the method and development. The value of the exhibit has been proved by the receipt of numerous letters from teachers asking for information and assistance.

To Chicago we sent 22 beautifully bound volumes of work distinctly marked with the name of the city and of the particular school contributing. In addition we sent a large and complete collection of drawing and moulding. The illustration of the Massachusetts state course in drawing was made up from the contribution of several cities, but Quincy's name appeared so often, that it attracted much attention. The High School course in drawing was favorably commented on by the Boston press. For general excellence the Quincy Schools have been awarded a medal and diploma by the Board of Examiners of the Columbian Exhibition.

XIX. BUILDINGS AND GROUNDS.

The Principals who have sought during the year to beautify their buildings or their grounds should be publicly commended. Such efforts teach lessons that, though silent, have a lasting effect on the children who see the picture or the bust, the plant, bush or tree. The grounds about the Lincoln School have undergone a wonderful transformation since May. A part of the yard has been reserved for a grassy lawn, and seventy-two trees and thirteen flowering shrubs have been set out. In addition 350 potted plants and 100 bulbs are now ready for the coming spring.

The most barren and forsaken of all the school grounds is that of the John Hancock ; but a vigorous effort will be made next May by the new principal to change its gravelly waste.

XX. NEW ROOMS.

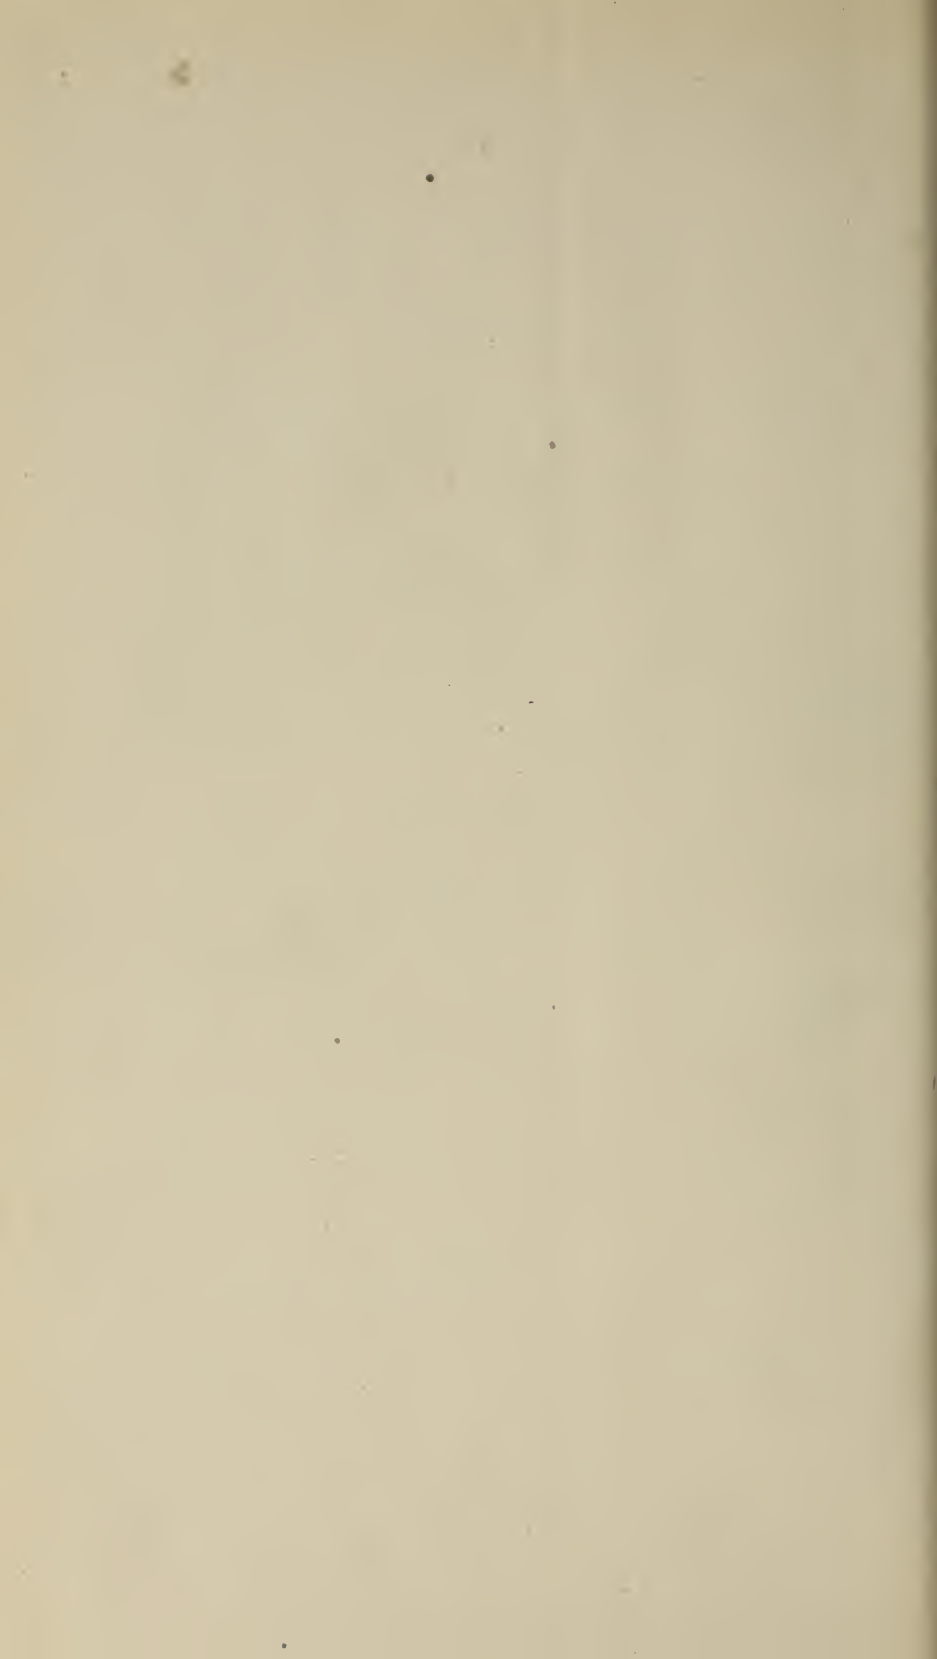

The School Board has been fortunate in its selection of new rooms, because of their central position as regards the electric and steam cars, and also because of their accessibility. In particular your attention should be called to the educational feature of the large "show window." Since the removal in August, at all hours of the day, men, women and children have stopped to examine the school work therein displayed. From week to week it has been changed as different teachers have forwarded samples to the office. At the present writing, it is safe to say that parents as a whole have a better idea of the breadth of the work of to-day than ever they had before. In this respect, if in no other, the change from a third to a first floor has been productive of good.

XXI. CONCLUSION.

Gentlemen, there has been no wonderful "record breaking" during the past year. It is no mean undertaking to hold the schools up to the high position where former superintendents left them and where they have stood for nearly twenty years in the estimation of the general public. In some lines of work there seem to be signs of growth, of new interest, and of a greater responsibility. However this may be, your superintendent has had the loyal support of the teachers as a body, the ready co-operation of this Board, and the consciousness that all his time and thought have been given to the school interests. With thanks to all to whom thanks are due, this report is respectfully submitted.

H. W. LULL,

Superintendent of Schools.

Arranged by O. B. Brown.
BY THE SCHOOL.
19. Valedictory,
EVA G. REED.
20. Presentation of Diplomas,
JOSEPH M. SHEAHAN, M. D.
11. Music,—Class Ode, (Words by Catherine T. O'Brien.)
D. Dutton.
BY THE CLASS OF '93.

CLASS ODE.

I.

When first we met, the goldenrod
 Bedecked our native land,
 And fields of wheat in beauty waved
 From strand to distant strand.
 Now summer breezes steal away
 To wood, and vale, and fell,
 In gentle whispers hear them breath
 The words of our farewell.

II.

The pleasures that the past disclosed
 In mem'ry fondly dwell,
 And often, as we backward gaze,
 Of happy days will tell.
 And though our future now is veiled,
 Its calm and storm to hide,
 Oh! Father dear, to Thee we call,
 Be Thou our friend and guide.

III.

Years passed in study side by side
 Have quickly sped away,
 They bring too soon the parting hour.
 We may no longer stay.
 So to our school life's cherished scenes,
 To teachers kind and true.
 To loving classmates one and all,
 We bid a fond adieu.

CATHERINE THERESA O'BRIEN.

Class Colors:—White and Corn Color.

Class Motto:—Ex vita scholae in scholam vitae.

 THE CLASS OF 1893.

Carrie Bird Baker,	Helen Elizabeth Nutting,

17. Music—Piano Duet,
MISS DAISY BEMIS AND MISS ELOISE FLOOD.
18. Award of Prizes.
19. Music—March Song: "Our Public School," *J. P. Skelly*
Arranged by L. C. F. Smith. Words by Frederic Allison Tupper.
SUNG BY THE SCHOOL.
- Order of Speaking Assigned by Lot.

OUR PUBLIC SCHOOL.

Dedicated to Wendell G. Corthell, Esq. Copyright, Charles F. Held, 1893.

The hope and pride of all the land,
Our Public School shall ever stand,
The rich and poor shall gather here,
In song shall rise their voices clear ;
And day by day each lesson new
Shall open wider fields of view,
And every radiant set of sun
Shall see some noble action done.

CHORUS.

Hail, public school, the people's glory !
Above thee waves our banner free,
Thou "Stars and Stripes" renowned in story,
Our sacred banner hail to thee.
The "Stars and Stripes" renowned in story,
Our sacred banner hail to thee !

Send hither at dear Wisdom's call
 The child most richly reared of all,
 Send hither from the humblest cot
 The children of a lowlier lot ;
 On equal terms they all shall meet,
 With kindly words each other greet,
 And here, as Wisdom's page they scan,
 They'll learn the brotherhood of man.

CHORUS.

Through life shall last the lessons taught,
 With memories of pleasure fraught.
 We'll track the sparkling planets' light,
 And mark the wild bird's heavenward flight ;
 Earth, sea, and sky their truths shall tell,
 And all their lore we'll treasure well,
 And as each truth is understood,
 We'll learn God's perfect fatherhood.

—*Frederic Allison Tupper.*

Award of the W. G. Corthell Prizes of 1893.

First prize: Hawthorne's works, full set; Mabel E. Oxford, '93.
 Second prize: Holmes' works, 11 vols.; Gertrude A. Boyd, '93.
 Third prize: Dickens' works, 10 vols.; Cassendana Thayer, '93.
 Fourth prize: Dickens' works, 7 vols.; Erminia Kolb, '93.
 Special prizes: Lowell's poems, Carrie B. Baker, '93; Whittier's
 poems, Mary L. Pierce, '95; Phœbe Cary's poems, Helen
 A. Turner, '96; Celia Thaxter's poems, Daisy Lowe, '95;
 Hoppin's Old England, Beatrice Briggs, '96.

George W. Morton, Esq., to the remaining contestants made the following special presentations. Hawthorne's *Marble Fawn*, Alice Sampson, '95; Fiske's *War of Independence* and Wallace's *Fair God*, Charles Baxter, '95; Holmes' poems, Mabel Drew, '96.

To these, in each case, Mr. Morton gave in addition, a set of Dickens' works in ten vols., and to Joseph J. Callahan, '93, who was unable to speak because of sickness, he also sent a set.

Award of the Dr. Joseph M. Sheahan Prizes.

TRANSLATIONS.

- First prize : Macaulay's works, 8 vols., Eva G. Reed, '93.
 Second prize : Hawthorne's works, 4 vols., Annie E. Burns, '93.
 Third prize : Longfellow's and Whittier's poems, Mabel Oxford, '93.
 Honorable mention : Nellie C. Murphy, '93; John W. Estabrook, '93.

ESSAYS.

- First prize : Whittier's works, 7 vols., Gertrude A. Boyd, '93.
 Second prize : Lowell's works, 4 vols., Annie E. Burns, '93.
 Third prize : { Longfellow's *Evangeline*,
 { Whittier's *The King's Missive*, } Mary Pitts, '96.
 { George Eliot's *Spanish Gypsy*, }
 Honorable mention : Nellie C. Murphy, '93; Charles J. Anderson, '96.

 SELECTIONS FOR TRANSLATIONS AND ESSAY
 SUBJECTS FOR 1894.

1,—For the best translation of Chapter XXIV, "*De Imperio Cn. Pompeii Oratio*," \$4. This prize is offered to the Cicero class.

2,—For the best translation from Virgil's *Æneid*, Book VI, lines 509-546, \$4. This prize is offered to the Virgil class.

3,—For the best translation of Book IV, Chapters XXIII and XXIV, Cæsar's "*Commentaries on the Gallic War*," \$4. This prize is offered to the Cæsar class.

4,—For the best translation of Flury's "*L' Histoire De France*:" "*La Premiere Croisade*," pages 113-116, \$4. This prize is offered to the advanced French class.

5,—For the best translation of Chapter VI, *Livre Quatrieme* of "*Le Petit Robinson De Paris*," pages 117-121, \$4. This prize is offered to the second French class.

The subjects for essays, for which a \$5 prize is offered in each class, are as follows:

FOR THE CLASS OF 1894.

- 1,—The Story of an Old House.
- 2,—The Practical Value of Astronomy.
- 3,—A Day in Merry Mount Park.
- 4,—The Greatness of New England.
- 5,—The Practical Value of Schools to a City.
- 6,—Quincy: (*a*) As a Place of Residence; (*b*) Its Opportunities for Investment; (*c*) Its Industries; (*d*) Its Historical Sites; (*e*) Its Other Claims to Distinction.

FOR THE CLASS OF 1895.

- 1,—The World's Fair.
- 2,—To Which Country do We Owe More—Greece or Rome?
- 3,—Our Debt to the Lower Animals.
- 4,—The Fairy Tales of Science.
- 5,—The Effects of Intemperance,*
- 6,—Perseverance as a Factor in Great Deeds.

FOR THE CLASS OF 1896.

- 1,—My First Year at the High School.
- 2,—Walks about Quincy.
- 3,—A Model Pupil.
- 4,—Practical Applications of the Mechanical Powers.
- 5,—A Good Vacation.
- 6,—“Make Hay, while the Sun Shines.”

FOR THE CLASS OF 1897.

- 1,—The Granite Industry of Quincy.
- 2,—The Use and Abuse of Newspapers.
- 3,—Why I Wish to take a High School Course.
- 4,—“There is Always Room at the Top.”
- 5,—My Favorite Author.
- 6,—Winter Sports.

*The word “Intemperance” is used in its broadest sense.

GENERAL STATEMENTS.

1,—Two dollars extra will be awarded that pupil whose essay shall be deemed the best of all offered in competition for the prizes.

2,—All prizes both for translations and for essays will be given in books, to be chosen by the winners from standard writers acceptable to the donors.

3,—All translations and essays must be handed in on or before February 28, 1894.

4,—Translations and essays must be signed with an assumed name.

5,—Together with each translation and each essay there must be handed in a sealed envelope containing: 1,—Both the assumed name and the real name of the pupil. 2,—A statement to this effect: The essay or the translation offered by —— (pupil's name) is my own unaided work.

6,—Use examination paper. Write on only one side of the paper. Neatness, spelling, and penmanship should be kept constantly in mind. Clear vigorous, and idiomatic English is always acceptable to the judges.

DECLAMATION PRIZES.

The scale for 1894 is as follows:

First, \$25; second, \$20; third, \$15; fourth, \$10; fifth, \$5.

These prizes are to be given in books under the same conditions as the prizes for translations and essays.

OUTLINE COURSE IN NATURE STUDY

S. E. BRASSILL,

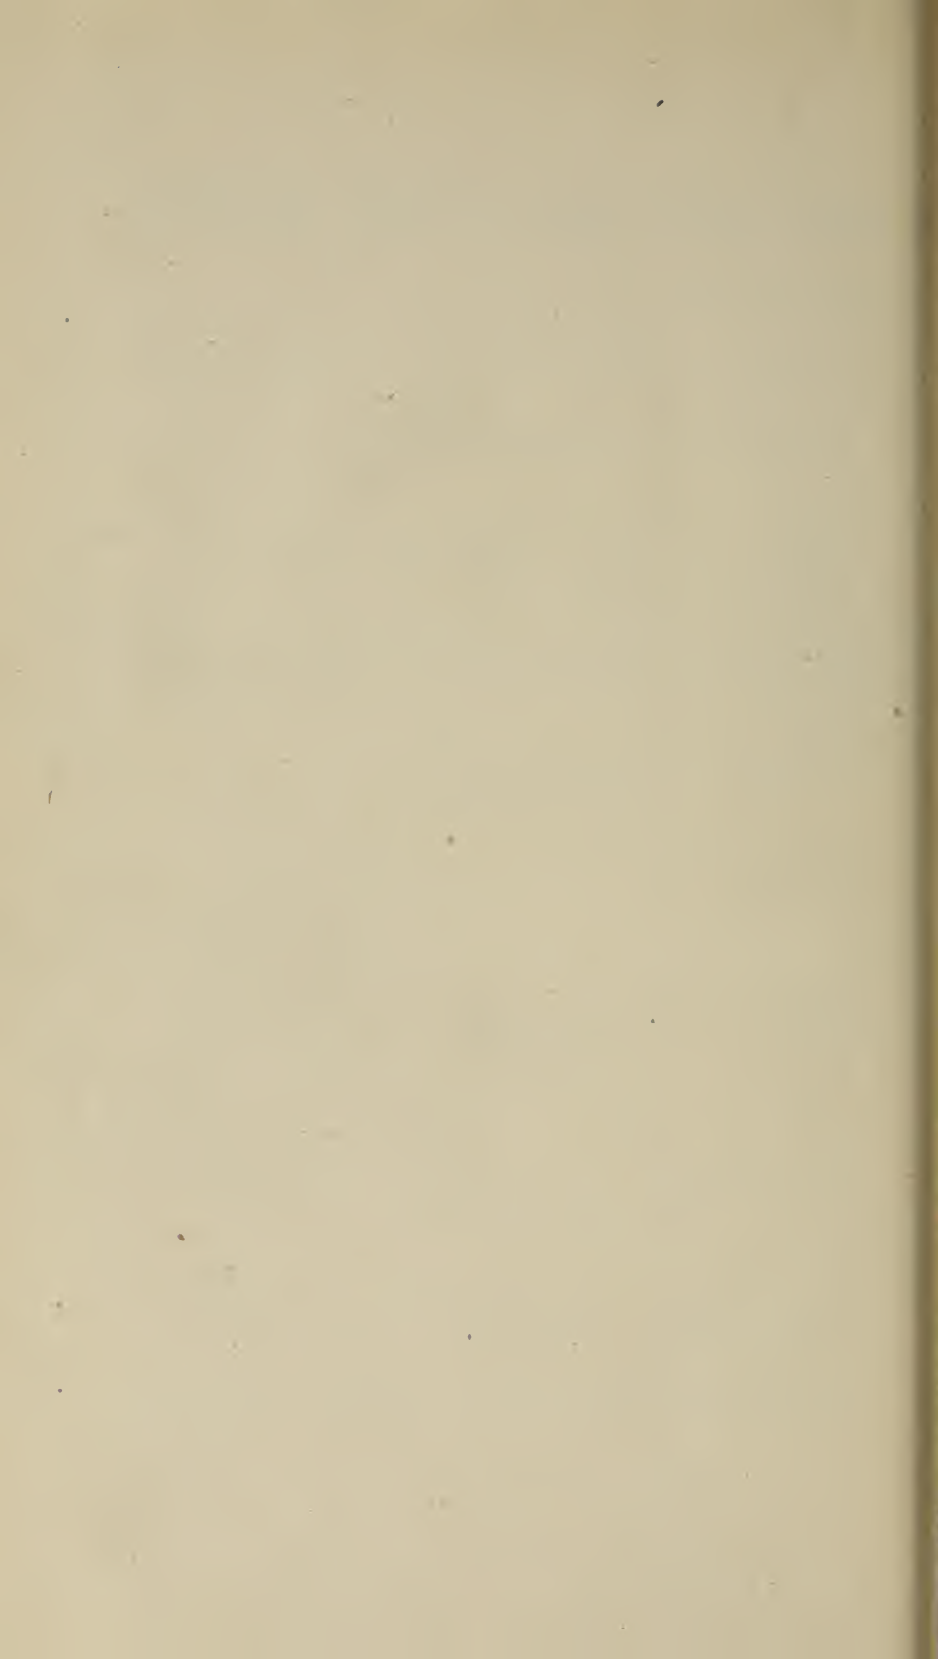

Grade.	MINERALS.	PLANTS.	ANIMALS.
I.	Lessons on Common Rocks and Minerals of this Locality.	Plants in their Season.	Pet and Domestic Animals.
II.	Properties and Uses of Minerals.	Parts of Plants with Simple Uses.	Native Birds. Common Insects.
III.	Groups of Minerals. Useful Mineral Products.	Parts and Uses of Plants (continued).	Other Common Animals of this Locality.
IV.	Soil. Building Stones.	Special Modifications of Plants and of their Parts.	Groups of Animals. Development.
V.	Series of Common Rocks. Weathering Rocks. Special Rock Formations. Metals and Ores.		
VI.		How Plants Grow. Typical Plants. Native Trees. Special Plant Products.	
VII.			Typical Animals.
VIII.	Local Topography.	Local Plant Life.	Local Animal Life.

FOR THE QUINCY PUBLIC SCHOOLS.

JANUARY, 1894.

HUMAN BODY.*	NATURAL PHENOMENA.	MATTER AND FORCE
Parts of the Body.	Daily Report of General Observations.	
Senses.	Daily Record by the School of General Observations.	Qualities of Bodies.
Tissues of the Body.	Individual Record of Observations.	Solids, Liquids and Gases. Formation of Crystals.
Vital Organs.	Land and Water Phenomena. Atmospheric Changes.	Heat.
Needs of the Body.	Weather.	Magnetism. Electricity.
Systems.	Heavenly Bodies.	Light. Chemistry of Plant Life.
Systems (continued).	Mineral, Plant and Animal; Maps of the United States and of Massachusetts.	Chemistry of Animal Life.
Special Study of the Senses, with Review of Previous Work.	Maps of Quincy, showing Mineral, Plant and Animal Resources.	Local Applications, with Reviews.

*Including Lessons on the Nature and Effects of Stimulants and Narcotics.

SEWING LESSONS.

GRADE V.

FIRST YEAR.—BOYS AND GIRLS.

Folding. Basting. Backstitching. Overcasting.
Hemming. Overhanding.
Proper wearing and use of thimble in connection with needle.
Right length of thread, threading needle and making knots.
Holding of work by left hand.
Position of work and needle taught in connection with stitch given; also beginning, joining and fastening of thread.
Stitches may first be drawn on paper, using the ruler to insure accuracy in length of stitch.
Hems, wide and narrow, may first be turned on paper, using the ruler for a measure.
Each new stitch should be preceded by a drill in the proper position of the hands and fingers while making the stitch; also a drill for the arms in the motion of drawing the thread and needle through the cloth.
MODELS: Articles brought from home may be towels, napkins and handkerchiefs to hem.

GRADE VI.

SECOND YEAR.—BOYS AND GIRLS.

Review first year's work. Overhanding on folded edges.
Overhanding on selvages. Wide hems.
Running. Especial drill given in the position of the fingers in making this stitch; also teaching the pupils to use the side of the thimble.

. Darning tear.

Stocking darning.

Patching on white cotton cloth and on calico or gingham.

Four-holed buttons sewed on.

MODELS: A pillow-slip, plain apron without gathers, small sheet or bibs.

GRADE VII.

THIRD YEAR.—GIRLS.

Review previous year's work.

Gathering, laying or stroking gathers, putting gathers in bands by backstitching and hemming.

Plain fell.

French fell.

Reversible seam.

Buttonholes.

Feather and herring-bone stitches.

The proper way of tearing or 'cutting cloth for bands or ruffling, viz.: lengthwise or across the grain.

Drafting simple undergarments for measurements.

MODELS: Apron with band. Plain white cotton or flannel shirt with band, buttonhole, and button sewed on.

GRADE VIII.

FOURTH YEAR.—GIRLS.

Review previous work.

Gathering as done on dress skirts.

Gathers overhanded to band.

Hemstitching.

Blindstitching.

Putting in gussets.

Cutting and joining bias bands; also the use of the same for facings, etc.

Tucking and ruffling.

Making placket.

Drafting child's dress.

MODELS: Some garment may be made combining the stitches taught, and teaching the cutting and putting together.

SUGGESTIONS FOR ALL GRADES.

Particular attention should be given to the position of the pupils while sewing.

Accuracy of rule and measure must be insisted upon.

Soft half-bleached cotton cloth and colored thread may be used for practice work. The colored thread shows the shape and size of the stitches better than white.

Materials for practice work for one pupil for the first year are as follows :

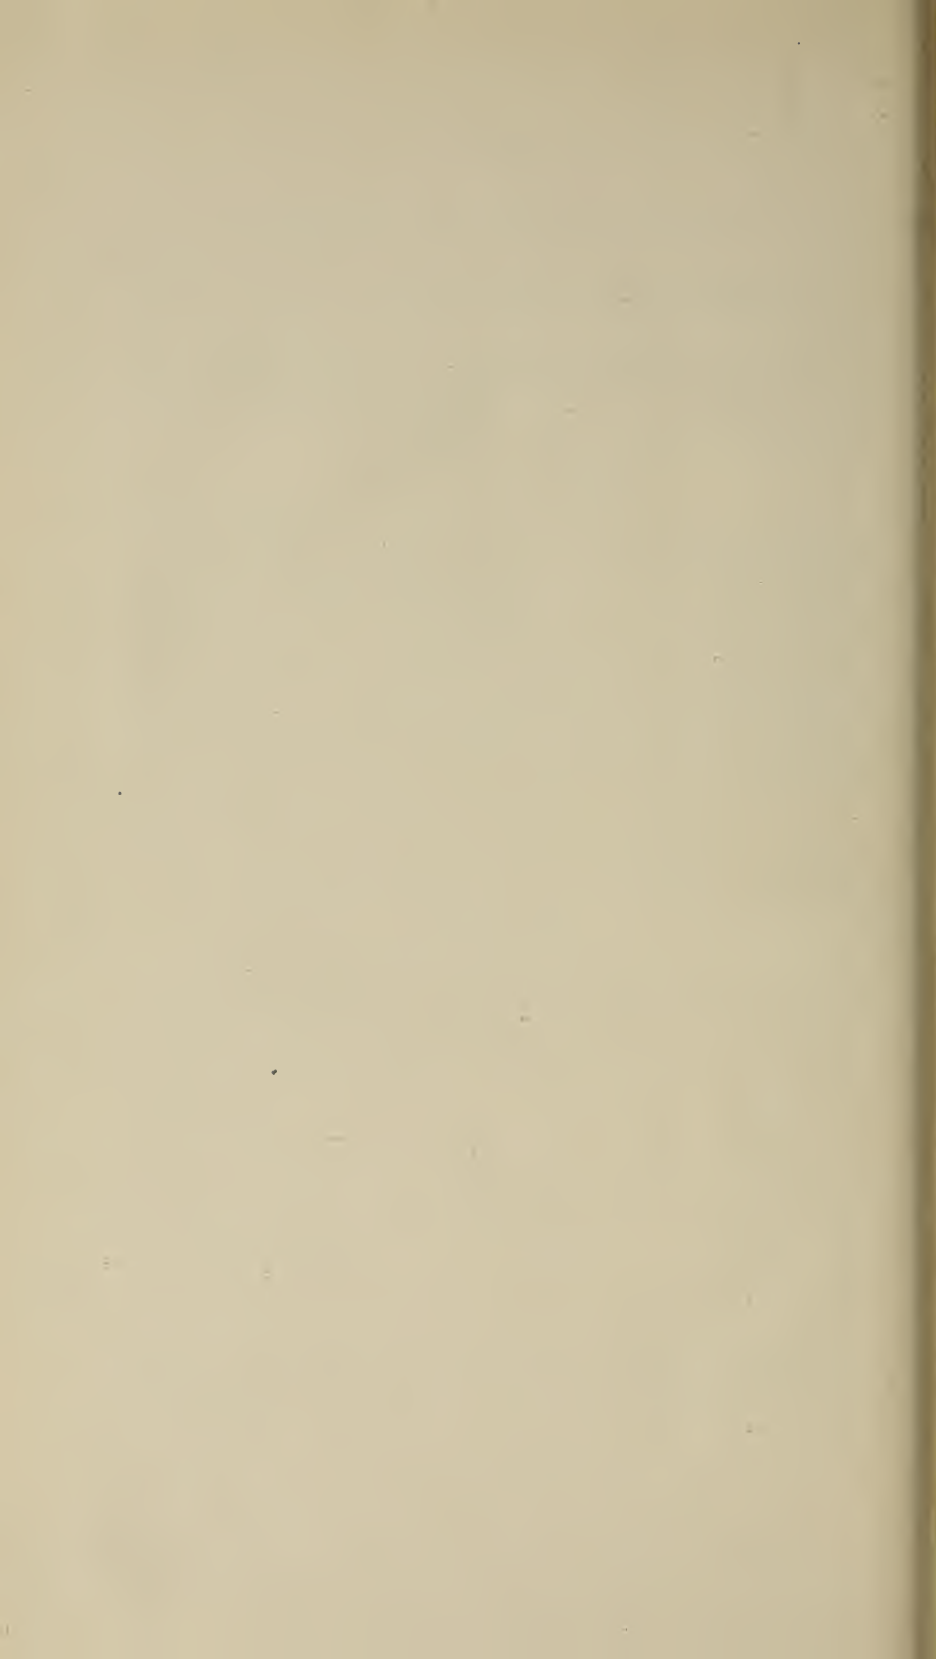

One-half yard of half-bleached cotton cloth.

One spool of red cotton, number 50.

One spool of blue cotton, number 50.

One spool of yellow cotton, number 40.

One thimble, pins, needles, and a sewing-bag made of one-half yard of calico, with owner's name sewed upon it.

SCHOOL COMMITTEE FOR 1894.
